Enjoy your free hosting account!

1. Đăng ký thành viên

- Nhập thông tin vào, sau đó click vào nút [Skip Page](#) để bỏ qua các thông tin không cần thiết

2. Chọn chức năng [Dashboard](#) để tạo website

- Khai báo các thông tin cho website:

Create web site

We may list your site in our directory listing and in some other pages depending on the quality of your site. The following to display your site in appropriate category.

Choose Domain:

Server Features: .NET 3.5, SQL Server 2005

Title:

Description:

Please provide a detailed description of minimum 5 lines and maximum 50 lines. While reviewing your site, we may look at your description to understand the nature of the site.

☒ I have read, understood and agree to the terms of use.

If this button is not enabled, choose a different domain from the dropdown list.

- Nếu chưa thấy dòng chữ **Completed Successfully**. thì hãy click vào nút **refresh**

ASP.NET Hosting - Check Site Status

Creating a web site is a time consuming background process. It may take upto 5 minutes to complete this process.

If you see the status as "Pending" for any of the below steps, [refresh](#) the page to view the updated status.

Creating Folders	Completed Successfully.
Creating Windows User Account	Completed Successfully.
Creating Virtual Directory	Completed Successfully.

Congratulations! Your site <http://aspspider.info/hocdelamgi> is ready. You may go to [Control Panel](#) and upload the files. Enjoy free web hosting with AspSpider.

"Repair" process will not fix the SQL Server database issues. You must attach/detach databases separately.

If you cannot get the issue resolved, please contact us through the [support forum](#) or [close your account](#) and create a new site.

3. Upload files

- Click vào Link [Control Panel](#)

AspSpider Free ASP.NET Web Hosting Control Panel

Control Panel » File Manager »

AspSpider: File Manager

Manage the files and resources in your ASP.NET web hosting account. You can upload new files, edit, rename or download files from your hosting account.

Current Path: <Root>

[Upload Files](#)
[Create Folder](#)
[Bulk Delete](#)
[Database Manager](#)
[Refresh Page](#)

	File	Size				
	database					Compress
	webroot					Compress

- Lần lượt upload các thư mục và tập tin của project đã được deploy: chọn nút **Upload Files**
Lưu ý: phải có tập tin **Default.aspx** làm trang khởi động

- Nếu upload file nén (phải là tập tin *.zip) thì chọn chức năng **Extract**

<div> <div>Upload Files</div> <div>Create Folder</div> <div>Bulk Delete</div> <div>Database Manager</div> <div>Refresh Page</div> </div>							
	File	Size					
	App_Code		Delete		Rename	Compress	
	App_Data		Delete		Rename	Compress	
	Bin		Delete		Rename	Compress	
	default.aspx	1 KB	Delete	Edit	Rename	Preview	Download
	support.txt	0 KB	Delete	Edit	Rename	Preview	Download
	Web.config	4 KB	Delete	Edit	Rename		Download

- Sau khi upload tất cả các tập tin và thư mục giống hình trên. Bạn có thể thử nhập URL vào trình duyệt để xem sơ qua
 Ví dụ: <http://aspspider.info/hocdelamgi>
- Trở về **File Manager** và chọn thư mục **database**
 - Upload tiếp tục file CSDL (Lưu ý: không upload tập tin ??????.log, chỉ cần .mdf)
 - Click vào nút **Database Manger** để upload file CSDL

Free ASP.NET Hosting - Database Manager

Manage your SQL Express & MS Access databases here.

File Name	File Type
	<div>Express Manager</div> <p>Attach, detach or backup your SQL Server Express database files.</p>
	<div>Query Analyzer</div> <p>Execute queries against your SQL Server or MS Access databases.</p>
	<div>File Manager</div> <p>Upload or download database files.</p>

- Chọn nút **Express Manager** để Attach tập tin CSDL

Express Manager - Manage SQL Server database

Click on the links to attach, detach or backup the SQL Server Express database file.

	File Name	Database Name	Attach	backup	Detach	Status
1	QLNHAHANG.mdf		Attach		Detach	

NOTE:

- * All SQL Express (*.mdf) database files under the folder <Root>database are listed above.
- * Attach and Detach are time consuming processes. It is handled by a background process and may take several minutes to complete.
- * Database file (*.mdf) and log file (*.ldf) will be counted for your total disk space usage.
- * Use [FileManager](#) to upload or download database files.

[Return to Database Manager](#)
[Return to File Manager](#)

- Nhấn link **Attach**

Database Manager - Attach SQL Server Express database

You are trying to attach the database file: QLNHAHANG.mdf

Enter a name for your database: hocdelamgi_

Database name will be automatically prefixed with your User Id, to avoid name conflicts with other user databases.

[Attach Database](#)
[Cancel](#)

- Sau khoảng vài phút xử lý, nếu bạn thấy màn hình như sau thì xem như thành công

Express Manager - Manage SQL Server database

Click on the links to attach, detach or backup the SQL Server Express database file.

	File Name	Database Name	Attach	backup	Detach	Status
1	QLNHAHANG.mdf	hocdelamgi_QLNHAHANG	Attach	Backup	Detach	Database attached successfully. SQL Server login created successfully. SQL Server access granted successfully. Added db_owner role successfully. Operation completed successfully.

- Cuối cùng, bạn mở file Web.config, hiệu chỉnh lại tên database thành tên mới như trên (QLNHAHANG → hocdelamgi_QLNHAHANG)

---- Chúc các bạn thành công! ---
