# DVD & VHS Video Library Catalog

# **Video Loan Process**

#### Link to New Titles

The Michigan Occupational Safety and Health Administration (MIOSHA), Consultation Education and Training (CET) Division, provides training video loan services through the following division:

MIOSHA Videos 7707 Rickle Street, P.O. Box 30677 Lansing, Michigan 48909-8177

E-Mail: <u>mioshavideos@michigan.gov</u> or Fax No. 517.322.3219 Telephone 517.322.2633

- There are no user fees assessed for the use of the training videos borrowed. However, the borrower is responsible for items borrowed and for paying the return shipment and insurance cost via an express package service. As the materials are loaned under special permission from vendors, it is strictly forbidden to copy and distribute these materials.
- All requests are handled on a first-come-first-served basis. Requests must be received at least 5 working days (Monday through Friday) in advance of the date by which the borrower needs the videos.
- Requests should be made directly to LESS at the above address. Use the <u>order form</u> provided. The shipping address given must be other than a post office box because shippers will not deliver materials to a post office box.
- Reservations may not be made more than six months in advance of the showing date.
- There is a limit of five items which can be borrowed for any one show date.
- There is a ten-day loan period limit. Borrowers who do not return materials on time will receive a written reminder. Borrowing privileges will be cancelled after the third late return.

- A borrower who does not return materials or who returns materials incomplete or damaged will be billed for the cost of replacing the missing/damaged items. Replacement costs for a video are determined by the actual cost of replacing it – generally between \$300 and \$500 per video. Failure to pay for replacement will lead to cancellation of borrowing privileges.
- Videos are copyrighted and cannot be duplicated.
- When returning videos, they must be addressed to the street address below: MIOSHA Technical Services Division (TSD) Laboratory and Equipment Services Section (LESS) 7707 Rickle Street, P.O. Box 30677 Lansing, Michigan 48909-8177
- Questions regarding this training video lending service may be directed to: MIOSHA Consultation Education and Training Division

7150 Harris Dr., P.O. Box 30643 Lansing, Michigan 48909-8143 (517) 322-1809

#### 2012 NFPA 70E: Electrical Safety in the Workplace

25 minutes

The National Fire Protection Association, NFPA, is the leading authority on electrical safety, especially in relation to protecting electrical workers from burn injuries associated with arc blasts. The most recent 2012 NFPA 70E standard has many changes and updates as compared to the outdated 2009 edition. In this program, the dual hazards of electric shock and arc flash are clearly explained and highlighted with dramatic arc flash footage, full-scale explosions and realistic reenactments of flammable clothing ignition due to arc flash incidents. While convincing your workers of the importance of wearing proper PPE, the video also explains the critical parts of the 2012 70E standard in detail. Topics include qualified electrical worker requirements, creating an electrically safe working condition, confirming a zero energy state, energized electrical work permits, approach boundaries, incident energy level, arc flash boundaries, hazard risk categories and how to properly dress for arc flash protection.

#### **2012 NFPA 70E: Electrical Safety in the Workplace (Concise) 1054 CC/ DVD** 13 minutes

The National Fire Protection Association, NFPA, is the leading authority on electrical safety, especially in relation to protecting electrical workers from burn injuries associated with arc blasts. The most recent 2012 NFPA 70E standard has many changes and updates as compared to the outdated 2009 edition. In this program, the hazards of arc flash are highlighted with dramatic arc flash footage, full-scale explosions and realistic reenactments of flammable clothing ignition due to arc flash incidents. While convincing your workers of the importance of wearing proper PPE, the video also explains the critical parts of the 2012 70E standard in detail. Topics include qualified electrical worker requirements, creating an electrically safe working condition, energized electrical work permits, approach boundaries, arc flash boundaries and hazard risk categories.

#### A BIT ABOUT BACKS (1993)

40:00 minutes (Modules 1, 2, & 3)

Covers back basics, risk factors and prevention strategies. Focuses, in a humorous way, on back care in day-to-day living - on and off the job. Will help employees understand how their backs work and how to make choices to protect them from injury.

#### A CALL FOR DR. REDD (1984)

24 minutes

This film stresses the factors that lead to fire disasters, such as insufficient training, employee carelessness, poor communications and work habits, and inadequate fire prevention methods.

### ACTIVE SHOOTER AND WORKPLACE VIOLENCE 1080 DVD

10:00 minutes

Emergencies involving violence are unfortunately a real possibility in today's workplace. This can also include encountering an active shooter on the premises. One of your job responsibilities is to be prepared and know how to respond should such an emergency occur at your workplace. Knowing the proper procedures to follow during an emergency could mean the difference between life and death. The purpose of this program is to familiarize you with basic response practices when encountering workplace violence, practices that will help you to be prepared for and to respond to a violent emergency. Topics include indicators of potentially violent behavior, how to respond to violent behavior, how to respond to an active shooter situation and how to react when law enforcement arrives at an active shooter scene.

#### **AERIAL LIFT SAFETY (1990)**

13:30 minutes

Training program for all employees who operate or work around aerial lifts. Real-lift in chemical and manufacturing facilities, refineries, and municipalities. Subjects include pre-operation inspection; preparing the work site; vehicle stabilization and traveling; safe work practice on platforms; and working near electrical lines.

#### AIDS PREVENTION FOR NURSING PROFESSIONALS (1988) 853 cc/ vhs

25:00 minutes.

You will learn from this video what your own risk is in caring for patients potentially carrying HIV and how to reduce this risk to an absolute minimum.

#### **AIR PURIFYING RESPIRATORS (1988)**

#### 18:48 minutes

Designed to provide an overview of respiratory hazards in the workplace and to demonstrate when an air purifying respirator (APR) needs to be worn and how to use it properly. Details evaluation and control of hazardous atmospheres and correct selection of respirators as it relates to the hazard. Fit testing, donning, care and maintenance are demonstrated.

#### ASBESTOS: UNDERSTANDING THE HAZARDS 804 DVD

#### 21 minutes

Don't risk life-threatening exposure! Prepare workers with this easy-to-understand program on asbestos awareness and abatement techniques. This program provides an understanding of the harmful effects of asbestos and how your workers can avoid them. Prevent exposure and related medical complications to your workers with this concise program. Motivate your employees to follow proper procedures when handling asbestos. Includes demonstrations of asbestos removal using glove bags and isolation space removal. This program covers:

- What is Asbestos?
- Health Hazards
- Hazard Communication
- Safe Work Practices
- Regulated Activities

### ASBESTOS AWARENESS: UNDERSTANDING THE RISK 1062 Sp&P/ DVD

#### 25 minutes

When it comes to asbestos, it's better to be safe than sorry. This program provides you with the basics of safe asbestos use – facts, risks, uses, dangers, and protection measures:

- Three forms of asbestos
- Adverse health effects
- Where asbestos can be found
- Hazard communication
- Personal protection
- Housekeeping requirements.

#### ATMOSPHERE SUPPLYING RESPIRATORS 219 VHS

#### 15:40 minutes

Describes the basic types of air line and SCBA respirators and illustrates advantages and limitations. Emphasizes proper donning procedures, fit checks, use and maintenance.

#### ATTITUDE AWARENESS (2007)

#### 27:00 minutes

Helps employees to identify how their attitude affects their job performance, especially safety performance. Four employees recognize the responsibility they each hold for their own actions.

674

867

#### **AVOIDING ELECTRICAL HAZARDS (1990)**

19 minutes

Includes information on keeping your environment safe; housekeeping, atmospheric hazards; tool care; power tools; electrical cords; test equipment, personal protective equipment; lockout/tagout, and more.

# B-A-C-K POSTURE, MECHANICS & EXERCISE (1990) 845 VHS

19 minutes

DVD

VHS

Industrial workers don't have to suffer from back pain because it's not *what you do* but *how you do it*. There are three major reasons for back pain: poor posture, improper body mechanics, and lack of exercise. This program helps address the issues causing back pain.

## **BACKHOE SAFETY**

18:00 minutes

Provides a general guideline for safely operating a backhoe. The appropriate personal protective equipment, pre-start-up checklist, safe start-up procedures, safe loading and unloading steps, safe digging and lifting and on the road safety are explained and illustrated.

#### BACK IN STEP

50:00 minutes

Provide your employees with a tool that gives them the information they need to take care of their injured backs. "Back in Step" is a motivational program created to help people recovering from back problems "make it through the day." An effective tool to give to each employee suffering from an acute injury.

#### BACK INJURY PREVENTION: YOU'RE IN CONTROL 861 cc/ DVD

16:30 minutes

Back injuries can affect any industry, any company, any person and their family. Learn how the back works, risk factors, common injuries, posture, lifting, physical condition, stretches, and exercises.

#### BACK SAFETY: EXERCISE AND ERGONOMICS 1061 DVD

15 minutes

They say you never notice the parts of your body until they hurt. This video stresses the importance of back safety training and discusses not only the risks involved in everyday body movement, but also the ways to prevent those risks from turning into debilitating back injuries. This back safety video presentation stresses a proactive approach including proper health through exercise and ergonomics safety. Information is offered on how to properly move through each day without adding undue strain and stress on the body. Viewers will be shown a range of basic stretching techniques as well as other methods and tips for safe lifting and healthy movement. Things such as a safety squat, ergonomic lifting, back injury prevention, stretching techniques and general OSHA lifting training are all covered in detail.

### **BACK SAFETY: LIFT FOR LIFE**

#### 15:00 minutes

Many of the causes of back injury can be prevented by teaching employees to follow proper lifting techniques and the basics of back safety. Help prevent incidents, accidents, and associated costs of back injury by educating employees with this engaging program. This program covers:

- Common Back Injuries
- Proper Posture
- Reducing the Hazard
- Accessing the Lift
- Lifting Safely
- Other Risk Factors

### BACK SAFETY: LIFT WELL, LIVE WELL (2001)

15:00 minutes

#### 914 CC/Sp/VHS/DVD

1027 CC/Sp/ DVD

Remind your employees that it's far better to take care of their backs before pain sets in with this valuable program. It teaches workers how to "head off" back pain by using their heads and always being aware of how to protect their backs from injury, through careful lifting and invigorating exercise.

#### **BACKS, A BIT ABOUT**

#### 40:00 minutes

Covers back basics, risk factors, and prevention strategies. Focuses, in a humorous way, on back care in day-to-day living, on and off the job. The modules will help employees understand how their backs work and how to make choices to protect themselves from injury.

DVD

#### BASIC TRAINING FOR GROUND OPERATIONS 1005

#### IN TREE CARE (5 DVD set) (2007)

#### 1 hour 10:25 minutes

Five video set with contributions from Peter Gerstenberger and Bob Rouse of TCIA, and Ken Palmer of ArborMaster TM Training. Titles are: *An Orientation to the Arboriculture Profession*, *Vehicle Safety, Job Planning & Preparation, Working Safely & Efficiently* and *Brush Chipper Operation & Maintenance*.

#### An Orientation to the Arboriculture Profession (Length 11:57)

- Some of the benefits and aspects of tree care as a career choice
- How to recognize and avoid the common hazards associated with tree work

#### Vehicle Safety (Length 9:30)

- Pre-trip vehicle inspections
- Defensive driving and traffic control
- Backing up and dumping

#### Job Planning & Preparation (Length 11:42)

- How to perform job site inspections
- The importance of the work plan, the job briefing and emergency preparedness

#### Working Safely & Efficiently (Length 21:09)

- Safe, efficient procedures and practices
- Topics such as assisting the climber, chain saw operation, command and response, and much more!

#### Brush Chipper Operation & Maintenance (Length 16:07)

• Safe practices with the traditional drum chipper as well as hydraulic in feed disk and drum chippers

• Major safety issues associated with hooking up, towing, operation and maintenance

### BASIC TRAINING FOR TREE CLIMBERS (5 DVD set) (2007) 1006 DVD

#### 2 hours 3 minutes

International tree climbing champs Ken Palmer and Rip Tompkins team up with veteran climbing instructor Robert Phillips to demonstrate the skills required to become a top-production tree climber. Five video set includes: *Getting Started, Rope Installation & Ascending, Climbing Spurs, Tying-In & Positioning* and *Working the Tree.* 

#### Getting Started (Length 37:00)

- Pros and cons of the various types of climbing gear
- The importance of a daily gear inspection and preclimb inspection of the tree and site
- How to tie important knots and climbing hitches

#### **Rope Installation and Ascending** (Length 29:00)

• Techniques for installing a throwline

#### • Detailed instruction in body thrust & footlock climbing

#### Climbing Spurs (Length 18:00)

- Selecting, fitting and maintaining spurs
- Proper spur climbing technique

#### Tying-In and Positioning (Length 21:00)

- Selecting a tie-in point that is safe and effective
- How to advance the climbing line and use the personal lanyard
- How to install and use a false crotch or redirect

#### Working the Tree (Length 18:00)

- How to re-crotch and double crotch
- Techniques for limb walking

# BEAT THE HEAT: PREVENTING & TREATING963CC/Sp&P//DVDHEAT DISORDERS (2007)

17:00 minutes

Heat stress seems like a minor inconvenience, but for workers in the heat, it can cause bodily harm, worksite accidents and even death. Items covered in the video are: thermo-regulation of the body, replenishing fluids, and prevention and treatment.

#### BEHAVIOR BASED SAFETY: MAKE THE RIGHT DECISION 994 DVD

#### 10:24 minutes

Using scientifically proven training and reinforcement techniques, behavior-based training encourages personal responsibility for safety from everyone in your organization. It identifies and rewards safe behavior, rather than affixing blame for unsafe behavior. This is part two of a four-part series that presents behavior-based safety to staff and crew members. It explains the theory behind behavior-based programs and their part in making the system work.

#### BEHAVIOR BASED SAFETY: STARTING THE PROCESS 995 DVD

11:56 minutes

Using scientifically proven training and reinforcement techniques, behavior-based training encourages personal responsibility for safety from everyone in your organization. It identifies and rewards safe behavior, rather than affixing blame for unsafe behavior. This is part three of a four-part series that gives step-by-step instructions on starting and implementing a behavior-based safety program.

#### BEHAVIOR BASED SAFETY: THE KEY COMPONENTS 996 DVD

#### 14:51 minutes

Using scientifically proven training and reinforcement techniques, behavior-based training encourages personal responsibility for safety from everyone in your organization. It identifies and rewards safe behavior, rather than affixing blame for unsafe behavior. This is part four of a four-part series that supports maintaining the program and give detailed instructions on ensuring its effectiveness.

#### BEHAVIOR BASED SAFETY: THE MANAGER'S ROLE 997 DVD

#### 14:36 minutes

Facilitator's guide included.

Using scientifically proven training and reinforcement techniques, behavior-based training encourages personal responsibility for safety from everyone in your organization. It identifies and rewards safe behavior, rather than affixing blame for unsafe behavior. This is part one of a

DVD

four-part series that explains how managers can move form the ineffective "safety cop" role to successfully influencing their staff's safety behavior.

#### **BIOLOGICAL THREATS IN HEALTHCARE: IDENTIFY & RESPOND (2005)**

Every day healthcare providers are exposed to potentially infectious bodily fluids. Today, workers must also be concerned about exposure to biological threats. In this vital program, employees will learn about the six major biological agents and how to effectively cope with exposure emergencies. Topics covered are: six major biological agents; symptoms, transmission, treatment and infection control; biological disaster preparedness; chemical attacks; clinical management of infected patients; and "all hazards" approach to facilities planning.

#### **BLOODBORNE PATHOGENS: A SHARPER IMAGE (1999)** 238 VHS

#### 19:00 minutes

We know much more about the spread and prevention of bloodborne pathogens but healthcare workers fail to consistently use safety precautions. You can change that and this program will tell you how.

#### **BLOODBORNE PATHOGENS FOR HEALTHCARE**

15:58 minutes

This program encourages personnel within the industry to use standard precautions -acombination of Universal Precautions and Body Substance Isolation. This means that all blood, body fluids, secretions, excretions (except sweat), no intact skin, and mucous membranes may contain bloodborne pathogens. This program covers:

- What bloodborne pathogens are
- How to protect yourself •
- Diseases that could be transmitted •
- What to do if exposure does occur •
- Potential exposure routes •

#### **BLOODBORNE PATHOGENS: PRISON VERSION (2001)** 852 VHS

10:00 minutes

In this program, you will learn about the important diseases associated with bloodborne pathogens and their respective symptoms, how they can and cannot be transmitted, proper procedures to prevent exposure, and steps to take if an exposure occurs.

#### **BLOODBORNE PATHOGENS: SCHOOL VERSION**

#### 10:45 minutes

Though the risk of exposure may be low, the consequences can be high. Everyone needs to understand how the disease is transmitted and the use of universal precautions. Specifically designed for industrial workers and emergency response teams, this school version video for grades K-12 covers:

- Bloodborne pathogens
- Modes of transmission •
- **Exposure** situations •
- Proper cleanup of spilled body fluids ٠
- Universal precautions •

#### **BLOODBORNE PATHOGENS: SCHOOL VERSION** 232

#### DVD

1026 CC/Sp/ DVD

Sp/

DVD

964

232

6:34 minutes

This Bloodborne Pathogens-HC program was developed for use by the largest world health and disaster relief organization. Meet all compliance requirements with this motivating live-action video that includes a creative opening sure to grab workers' attention and hold their interest. Bloodborne HC is designed for training employees in various industrial sites. Many employees encounter situations where infection from blood and other body fluids is a risk factor. This program is an essential employee safety component in this age of AIDS, Hepatitis, and other bloodborne diseases. Your employees will learn:

- Bloodborne Pathogens, including Hepatitis B and C, and HIV
- Modes of Transmission
- Exposure Situations
- Exposure Control Plans
- What to do if Exposed

### BLOODBORNE PATHOGENS: TAKE PRECAUTIONS (2008) 921 CC/Sp&P/ DVD

13:00 minutes

This valuable program teaches employees to protect themselves from bloodborne pathogens by learning about the three types of viruses and how they spread, plus what they can do to prevent infection, from avoiding exposure to blood to cleaning up after accidents occur.

### BLOODBORNE PATHOGENS: UNIVERSAL PRECAUTIONS 1025 cc/sp/ dvd

13:54 minutes

Bloodborne pathogens are infectious materials found in blood and other bodily fluids that cause disease in humans. This program will keep workers informed about situations where infections from blood and other body fluids are a risk factor.

This program uses real life scenarios, on-site footage, and high-end animation to provide employee's with the knowledge and training necessary to protect themselves and their coworkers. No matter the occupation, the risk of encountering bloodborne pathogens is present. Teach your workers the hazards of bloodborne pathogens and how to reduce the risk of exposure. This program covers:

- What bloodborne pathogens are
- Diseases that could be transmitted
- Potential exposure routes
- How to protect yourself.

### BONDING & GROUNDING OF FLAMMABLE LIQUID 710 VHS

#### 9:09 minutes

Explanation of the need for proper grounding during the transfer of flammables, basic discussion of static electricity and the hazard it creates. Ensure employees understand how bonding and grounding eliminate electric potential and remind them of the proper pre-transfer steps.

#### **BURIED TRUTH UNCOVERED, THE (2009)**

1019 dvd

#### 40:00 minutes

Eric Giguere, a 33 year old former construction worker from Waterloo, NY, shares his story of how he was buried alive while working in a trench. Eric explains the circumstances and events that led up to his accident and the profound effects it has had on him and his family for the last six years. Eric speaks from the heart with a desire for the listeners to learn from his death defying safety message. He has a very genuine approach and the intent of his presentation is to prevent this experience from ever happening to anyone again. Eric explains how he is an

#### - 24 -

average guy and a series of extraordinary events left him with an unbelievable story to tell. Once you have heard Eric's story, damage prevention will be more important to you than ever before.

#### **CARE AND USE OF APR'S**

13:00 minutes

Explains how to use and maintain air purifying respirators correctly. Workers will understand the reasons for accurate fit testing and the importance of inspecting and fit checking a respirator before each use.

#### CARPAL TUNNEL SYNDROME:

# THE "KEY METHOD" OF PREVENTION (1986)550VHS15:00 minutesFor supervisors, aimed specifically at prevention before the fact.Supervisors are acquainted

For supervisors, aimed specifically at prevention before the fact. Supervisors are acqua with the concept of look, listen and take action to prevent trauma disorders.

#### **CAVE-IN RESPONSE**

This video trains your personnel how to respond safety to a cave-in and not become a victim. This video will show you how to safely respond to and report a trenching emergency and the steps a rescue team uses to perform a safe rescue.

#### **CELL PHONES IN THE WORKPLACE:**

#### A DANGEROUS DISTRACTION

15 minutes

Our cell phones are powerful tools that allow us to have instant access to information and communication. When used appropriately, these devices can make our lives easier and more enjoyable, but when used at the wrong time and in the wrong manner, these same devices can get us in trouble at work and cause serious injury. This program discusses how sending and receiving text messages can cause us to lose focus on doing our jobs safely and efficiently as well as the importance of always following your company's policy regarding cell phone use. Also featured are several workplace scenarios that illustrate the tragic consequences of ignoring these polices in order to text when it is unsafe or prohibited. Other topics include how cell phone use adversely affects our production level, following the company plan for emergency contact, appropriate use of company-owned cell phones and why we must have the courage to speak up and refuse to participate in unsafe and inappropriate texting.

#### CHARLIE ANSWERS THE TOUGH QUESTIONS

#### 23:00 minutes

Charlie answers the questions that are on everyone's mind:

- What do you think about firing people for safety violations?
- What would have made you wear your safety equipment?
- Wasn't the company responsible?

By addressing these and other issues openly and honestly, Charlie puts an end to the "blame game" and changes attitudes toward safety.

# COACHING SAFETY PERFORMANCE965sp&p/DVDJOB SAFETY ANALYSIS (2008)

12 minutes

Job Safety Analysis (JSA) is a way of planning ahead, a way to spot problems before they become accidents. JSA focuses only on those steps that create a hazard to the safety or health of

# personnel. This program is designed to help prepare a JSA: preparing for the JSA, self-inspection; and identifying job steps.

#### COLOR OF SAFETY, THE

#### 26:30 minutes

Completely up-to-date version of The Color of Danger. This lift truck safety video is a guide for both experienced and new lift truck operators. Learn safe methods of operation, hazards and what to do in the event of a tip-over.

#### COMBUSTIBLE DUST: INCIDENT PREVENTION

12:00 minutes

Dust explosions are serious problems that reach a wide range of industries. During the past 25 years, there has been a reported 281 major combustible dust incidents reports, killing 119 and leaving over 720 workers injured as well as causing multi-million dollars in property damage.

This program will ensure to educate your employees on alertness of hazards and teach a commitment to following good housekeeping and safe work practice. Topics covered include:

- Hazards of combustible dust
- Safe work practices
- Preventing dust explosions
- Emergency procedures

### COMPETENT PERSON & SOILS TESTING, THE 1023 DVD

27 minutes

What every competent person needs to know including:

- who is the "competent person" & responsibilities
- soil classification system
- five easy field tests for determining soil types
- how to be prepared for and handle an OSHA inspection.

#### **COMPRESSED GAS CYLINDERS**

14:45 minutes

Improper handling of compressed gas cylinders can cause devastating damage and severe injuries. Educate your employees on the proper handling of compressed gas cylinders with an increased awareness and respect for the hazards associated with compressed gas cylinders. This video covers:

- Potential hazards
- Pre-use inspection and testing
- Best safety practices for handling and use
- Proper storage and transportation

#### **CONFINED SPACE CASE HISTORIES (2008)**

#### 14:00 Minutes

Reenactments of real-life confined space accidents emphasize the importance of following proper confined space safety procedures. Topics include: safety atmospheric testing and monitoring; training the entry team; ventilation; personal protective equipment; and reviews what went wrong and accident prevention.

#### CONFINED SPACE ENTRY PERMIT REQUIRED (2007)

#### 21 minutes

Protect your workers from the dangers of working in a confined space. This video reviews the details on how to prepare a confined space entry permit and the best way to train a confined space entry team.

#### **CONFINED SPACE RESCUE:**

#### A JOB FOR PROFESSIONALS (1993)

16:00 minutes

Interviews employees involved in a confined space fatality. Explains the hazards and motivates employees to call for a properly trained rescue team.

### CONSTRUCTION ELECTRICAL SAFETY (2008)1012sp/DVD

10 minutes English & Spanish Electricity is an invaluable tool in construction but if handled improperly even a small amount of current can cause injury or death. This program shows how to recognize and avoid electrical hazards. Subjects covered include ground fault circuit interrupters, lockout/tagout; extension cords, personal protective equipment, power tools, elevations for unguarded live parts and open conductors, and what to do if you ever encounter someone who has accidentally been electrocuted.

#### CONSTRUCTION SAFETY ORIENTATION

19.00	minutes
12.00	mmutes

On construction sites many variables can cause accidents and injuries, this program is ideal for anyone who works at a construction site. This video conveys four key principles to all construction workers:

**Spanish only** 

- Analyze the work area and the job to be performed.
- Recognize and respect hazard warning signs and labels.
- Identify and eliminate or control any potential hazards.
- Remain aware of all activity taking place around you.

This program covers a variety of construction related safety topics including: Electrical hazards, Excavations, Fall Protection, Hazard Recognition, Hazardous Materials Safety, Hoists and Slings, Hot work, Housekeeping, Ladder Safety, PPE, Scaffolding Safety, Vehicle Traffic.

#### CONTRACTOR SAFETY CONSTRUCTION WORKERS 787

16:00 minutes

You are responsible for the safety of contract workers at your site. Training with this program will help reduce the risk to your contract workers and your bottom line. This video talks about: Safety responsibilities of construction workers, Potential hazards commonly found in construction work environments and How to recognize hazards that may pose a risk.

#### **CRANE INSPECTION**

18 minutes

Would you bet your life that your crane is up to its job? Did your last lift stress your crane almost to the breaking point? To stay alive and keep co-workers safe, you need to make sure your crane is ready to do the job - and the best way to do that is with a crane inspection. Program includes:

- 26 -

- Daily and monthly inspections
- Rigging

### Preparing for inspection

#### **CRANE RIGGING SAFETY**

#### 16 minutes

In this video, you will learn how to rig a safe lift. This includes selecting slings and hitches, setting up the rigging, and stabilizing the load.

### **CRANE OPERATIONS: HAND SIGNALS**

#### 14 minutes

Crane operations is an integral part of any worksite, employing and potentially endangering approximately 250,000 operators and workers. The signal person plays a critical role in safe crane operations, giving the operator a second pair of eyes on the ground. Ensuring your workers know and understand the universal, non-verbal hand signals that are used while working with and around these potentially dangerous and massive machines as well as:

- The signal persons role
- Best work practices
- Standard hand signals

#### **CRANE SAFETY: MOBILE CRANES**

14:40 minutes

Crane incidents are nearly always serious accidents with catastrophic and costly consequences. Ironically, most crane incidents are preventable. Topics covered in this video are: load chart interpretation and usage, quadrants of operation, outriggers, and hazards in operating environments.

#### **CRANE SAFETY: OVERHEAD CRANES**

18:00 minutes

Prevent injury and equipment loss by training workers to safely work with and around cranes. Inspections, pre-lift considerations, safe operating and lifting techniques are covered. Other topics include gantry and E.O.T. pre-operation inspection and, slings, hood and magnets.

#### **CRANE SAFETY: OVERHEAD OPERATIONS**

18:30 minutes

Facilitator's guide included.

Crane incidents are nearly always serious accidents with catastrophic and costly consequences. Ironically, most crane incidents are preventable. Overhead Operations covers different types of cranes, pre-operation inspections, hand and light signals, and weight capacity.

### CRANE SIGNAL PERSON – BASIC TRAINING1021DVD

18:00 minutes

Crane Signal Person Basic Training is an important resource to help crane signal people and crane operators learn the 20 standardized hand signals as described in ASME B30.5 and OSHA 29 CFR 1926. This program presents:

- A general overview of crane operations and limitations
- Clear demonstrations of the 20 standard crane hand signals
- An explanation of correct voice signal communication
- Guidelines for using non-standard and new signals

Everyone, especially new employees, should view Deadly Dust II before being shown "Deadly Dust III.

#### DEFENSIVE DRIVING: PREPARED FOR THE WORST (1997) 708 cc/sp/ dvd

18:00 minutes

How to deal with road hazards, poor weather condition, vehicle collisions and crime. Shows how to stay in control by being prepared for the worst. Topics: Nature's forces, Night driving, Breakdown basics, Accidents, Road construction, and Personal security.

#### DISTRACTED DRIVING: AT WHAT COST

15:00 minutes There's a lot of talk about this issue but most of us don't realize how often we're distracted while driving. A new study shows that up to 50% of crashes involve some sort of driver distraction. This new video helps us become aware of this increasingly dangerous behavior. The video includes a two car crash that is investigated and shows how each driver was distracted leading up to the crash. It also includes an interview with a woman who was severely injured in a crash caused by a distracting cell phone conversation. Her parents also talk about how their entire family's lives were changed by the crash.

# DON'T BE A DUMMY ABOUT INDUSTRIAL SAFETY 1081 DVD

23:00 minutes

In this video from our "Don't Be a Dummy" Series, our workplace "dummies" show viewers just how easily accidents can happen. But accidents don't just happen to dummies, they happen to real workers with families, like your employees. This comprehensive orientation program covers sixteen specific training topics essential for new hires while stressing the importance of development of a good safety attitude. Topics include: Lockout/Tagout, Electrical Safety, Power Tools, Warning Signs, Good Housekeeping, Emergency Plans, PPE, and Working around Machinery.

### **ELECTRICAL SAFETY**

10:21 minutes

This video covers electrical safety procedures that will help you comply with OSHA's Electrical Safety Standard. It will introduce workers to the principles of electricity, show them how to avoid the dangers of electrical shock and demonstrate the correct responses to electrical emergencies. The following topics are covered:

- Electrical principles
- Electrical hazards
- Engineering controls
- Safe work practices
- Real-Life Situation

#### **ELECTRICAL SAFETY: BASIC PRINCIPLES**

VHS

DVD

DVD

DVD

1079

#### 15:00 minutes

Anyone working with electricity must know and apply basic safety principles and proper emergency procedures. This popular program defines common electrical terms and explains:

- Housekeeping
- Circuit protection devices

#### ELECTRICAL SAFETY: DOWN TO THE WIRE

30:00 minutes (3 videos - 8 to 12 minutes each)

Three quick running videos on one cassette designed to help kick off safety meetings, stimulate discussions and get points across quickly.

# New

#### ELECTRICAL SAFETY FOR EVERYONE (Concise Version) 1076

11 minutes

Because electricity is so important to our everyday lives, it is surprising that many of us know very little about it or the hazards it presents. Many workers don't understand the dangers of electricity and don't follow safe work practices when working with or around electricity or electrical equip-ment. You don't have to be a qualified electrical worker or electrician to have a need to understand electrical safety. In fact, all workers should know and practice basic electrical safety. This program provides viewers with a general under-standing of how electricity works while showing them the actions they can take to prevent becoming part of an ener-gized electrical circuit.

# ELECTRICAL SAFETY FOR EVERYON

# ELECTRICAL SAFETY FOR EVERYONE

20:00 minutes

Because electricity is so important to our everyday lives, it is surprising that many of us know very little about it or the hazards it presents. Many workers don't understand the dangers of electricity and don't follow safe work practices when working with or around electricity or electrical equipment. You don't have to be a qualified electrical worker or electrician to have a need to understand electrical safety. In fact, all workers should know and practice basic electrical safety. This program provides viewers with a general understanding of how electricity works while showing them the actions they can take to prevent becoming part of an energized electrical circuit. Topics include why electricity is dangerous, resistance and Ohm's law, two electrical safety concepts, grounding, avoiding electrical contact, safe work practices, use of double-insulated tools and GFCIs and response to a shock event.

# ELECTRICAL SAFETY FOR THE QUALIFIED WORKER 1078

(Concise version)

13:00 minutes

Electricity is a powerful force that can cause serious injury and death. When it comes to electrical job tasks, it only takes an instant to turn a momentary mistake into a fatality. This is why qualified electrical workers must understand the hazards presented by exposed energized parts and know how to protect themselves through the use of safe electrical work practices.

That's the purpose of this program--to explain the safety precautions these employees must always take to avoid needless tragedies while performing any type of electrical work.

# NGM

# ELECTRICAL SAFETY FOR THE QUALIFIED WORKER 1077

20:00 minutes

Electricity is a powerful force that can cause serious injury and death. When it comes to electrical job tasks, it only takes an instant to turn a momentary mistake into a fatality. This is why qualified electrical workers must understand the hazards presented by exposed energized parts and know how to protect themselves through the use of safe electrical work practices. That's the purpose of this program--to explain the safety precautions these employees must always take to avoid needless tragedies while performing any type of electrical work. Topics include the definition of a qualified worker, approach boundaries, the shock hazard of electricity, voltage-rated gloves and PPE, the arc flash boundary, PPE Levels of arc flash protection, creating and verifying an electrically safe work condition and exceptions when energized work is allowed.

### ELECTRICAL SAFETY: HIGH VOLTAGE AWARENESS 734 vhs

16:20 minutes

Understand the potentially destructive force of working with high voltage electricity (600 volts of electricity and higher). Learn the hazards associated in working with or around electricity. Graphics show lightening blowing up a substation. Covers the proper use of personal protective equipment, the use of general protective equipment, grounding equipment, gloves and hot sticks.

735

993

VHS

CC/Sp/

DVD

#### **ELECTRICAL SAFETY:**

#### HIGH VOLTAGE SAFE WORK PRACTICES

14:51 minutes

Working with 600 volts of electricity and higher. Step by step importance of lockout/tagout procedures, emphasizing the importance of following an established safety plan initiating safe work practices. Policy requirements and emergency procedures are explained in detail.

#### ELECTRICAL SAFETY: NFPA 70E

17:40 minutes

Facilitator's guide included.

Electrical Safety: NFPA 70E will train employees on the hazards of working with electrical currents.

### ELECTRICAL SAFETY NFPA 70E CONTROL

THE CHARGE (ARC FLASH)	1073	Sp/	DVD
------------------------	------	-----	-----

18:00 minutes

Details updates to the NFPA 70E standard for 2012. Protect yourself and your employees from these statistics: Arc flash accidents can heat to air to temperatures as high as 35,000 degrees Fahrenheit and can produce a blast as high as 2,000 pounds per square foot, sending over 2,000 people to burn centers every year. This course covers:

- Electrical Hazards
- Safety Planning
- De-Energizing Equipment, and
- Working Hot

DVD

#### ELECTRICAL SAFETY: WHAT EVERYONE SHOULD KNOW 1035

#### 12 minutes

When it comes to electricity, some hazards are pretty obvious. Then there are electrical hazards that we don't recognize or we choose to ignore until someone gets a painful or fatal shock. This program is intended for everyone in your organization who uses electricity on or off the job, and presents important electrical safety information that everyone needs to know, including these three important issues: how electricity works, what happens when the human body and electricity meet, and what we can do to make sure we're always using electricity safely.

#### **ELEMENTS OF ERGONOMICS**

10 minutes & 14 minutes

This program contains two modules designed to provide your employees with an understanding of the importance of ergonomics and how to implement an effective ergonomic plan in your company. Module one, "Basics of Ergonomics," provides a general overview of ergonomics. Module two, "Elements of an Ergonomics Program," outlines the necessary elements of a successful ergonomic program. *(CET Consultant comments: "Attention getting. Good visual examples - ball bearings, rotating tables, elevating tables. The video covered the basics – repetition, force, posture, contact stress, and vibrations.)* 

#### ELEVATED WORK PLATFORM SAFETY

19 minutes

Elevated work platforms such as scissor and boom lifts allow us to safely perform various tasks and maintenance operations at heights that otherwise may be unreachable. While there are many different styles of lifts designed for various applications and site conditions, they all have one thing in common: the potential for serious injury or death when operated in a careless manner. Electrocution, falls, crushed body parts and tip-overs are just a few examples of incidents that often result from unsafe operation. This video discusses the procedures lift operators must follow to prevent these types of incidents.

#### EMERGENCY PLAN/FIRE PREVENTION (for grain elevators) 526 vhs

7:25 minutes

Discusses areas of primary concern for fire prevention, outlines procedures for location and operation of fire extinguishers, lists elements of emergency response plan. Illustrates emergency response drill.

# ERGONOMIC TASK ANALYSIS 961 DVD Two 14 minute modules

Teach your team the basic concepts, knowledge and skills necessary to perform an ergonomic task analysis in a manufacturing setting with this quality, two-module program. Classroom and field sessions teach participants what to look for in their workplaces so that they can make effective ergonomic improvements.

#### ERGONOMICS FOR THE MOBILE WORKER1067DVD

#### 15 minutes

When we work in a typical office, we have the advantage of ergonomically adjustable office equipment and furniture. But when we rely on laptops, tablets and smartphones in settings that range from coffee shops to hotel rooms to our kitchen table, we need to be aware of what we can do to create our own comfortable work environment. This program discusses posture and how it impacts the proper use of mobile office equipment, the special challenges it presents and the importance of positioning and moving our bodies as we work.

#### ERGONOMICS IN THE WORKPLACE (1995)685

18:00 minutes

Ergonomics as it is practiced by workers and supervisors. How to spot and correct work station design and worker postures to keep workers healthy and productive.

#### **ERGONOMICS: "PREVENTING MSDs"**

17:00 minutes

When you train with this video, your workers will learn what musculoskeletal disorders are and measures they can take to reduce their exposure to risk factors and prevent injury.

#### ERGONOMICS: "PREVENTING MSDs" SUPERVISORS MODULE

16:25 minutes

When you train with this video, your workers will learn what musculoskeletal disorders are and measures they can take to reduce their exposure to risk factors and prevent injury.

#### EVERY TIME I LOOK AT MY HAND

12 minutes

This videotape program features testimony from workers who have suffered traumatic, disabling hand injuries. Through their testimony, the viewer will learn the importance of taking the time to do a job correctly. Nip points, loose clothing and jewelry, lockout/tagout and using proper tools are all covered in the video.

#### EXCAVATIONS: SAFE WORK ESSENTIALS

#### 15:30 minutes

When the walls of your excavation fail, it can be a disaster. Though it is one of the most dangerous job tasks, countless excavations are performed each day. In fact, at least three people

CC/Sp/

are killed every month in the United States from excavation-related accidents. This DVD explores:

- What are excavations?
- Potential hazards
- Protective measures
- Safe work practices.

#### EXCAVATIONS, TRENCHES AND SHORING

13:30 minutes

Personnel who work in or around excavations and trenches need to be aware of the hazards and how to prevent cave-ins and other accidents. This video will demonstrate an overview of protective systems, regulatory requirements, and safe work practices.

726

DVD

#### EXPOSURE CONTROL: BLOODBORNE PATHOGENS (1992) 136 VHS

#### 95:00 minutes

This program is a multimedia program which includes a video, workbook and audio program. It gives a background of the regulation, describes the elements of an exposure control plan, how to make an exposure determination, how to develop Standard Operating Procedures, housekeeping requirements, personal protective equipment selection and use, the HBV vaccination program, and post exposure follow-up.

EXTREME DRIVING QUIZ	929		DVD
46 minutes			
Will you know what to do if your car is submerged in w	water, you see a ca	r coming s	straight at
you, or you experience a rollover? This video lets you	decide the best an	swers for	these and
other extreme driving situations.			
EYE SAFETY	878	CC/	DVD
12:00 minutes			
This video delivers important information on eye prote	-	-	-

This video delivers important information on eye protection with a unique emphasis on personal responsibility. The viewer is provided with three steps to eye safety that are extremely easy to relate to and understand. Interviews with "real" people who would have lost their eyesight if they hadn't been wearing eye protection provide powerful reinforcement for safe behavior.

EYE SAFETY: NO SECOND CHANCES	907	CC/	DVD
20.45 minutes			

#### 20:45 minutes

Facilitator's guide included.

Prevent disabling eye injuries at your workplace by training with "Eye Safety: No Second Chances". Training workers to properly select and use the right eye protection works best when it also motivated workers to consistently use the equipment. The program features scenes from a variety of job sites that show several situations where eye protection is needed and used correctly. Your workers will develop a respect for eye protection and understand the life-long consequences from not using adequate eye protection.

#### FALL ARREST SYSTEMS

VHS

795

#### 15:00 minutes

This video shows viewers how to properly select and use personal fall arrest systems so they can work safely above ground. Topics include forces involved in falls, components of a fall arrest

system, inspection of the equipment, calculating fall distance, selection of an appropriate connecting device and the importance of choosing a legal tie-off point.

#### FALL PROTECTION

9:57 minutes

Safety is never a sure thing. Only through constant awareness and good practices can you prevent the possibility of falling on hard times. This program covers the elimination of fall hazards, prevention of falls, and the control of falls.

#### FALL PROTECTION: MAKE THE CONNECTION 1050

20 minutes

Falls are the fourth leading cause of work-related fatalities in the United States. Even a short fall can cause serious injury or even death. When your workers are working at heights, you cannot let safety standards come crashing down. This training program, based on Subpart M of OSHA Standard 1926, highlights fall protection measures for employees.

#### FALL PROTECTION: PERSONAL FALL PROTECTION 507 VHS

22:00 minutes

Explains the differences between fall restraint and fall arrest; requirements for lanyards, anchorages and body support; how to avoid common hazards; procedures for care and inspection of equipment.

#### FALL PROTECTION: TAKING CONTROL (1994) 502

11:00 minutes

This program will assist in training employees to recognize and respect potential fall hazards in work place, and provide understanding of proper use and care of personal fall protection equipment. Also discusses the importance of a proactive safety attitude in preventing work place falls.

#### FIRE EXTINGUISHERS: READY TO RESPOND 1034

13 minutes

What could be more boring than fire extinguisher training? Not this video! Every year fires in the workplace cause thousands of employee injuries. Fires also cause millions of dollars in damage to personal and company property. Use this upbeat video to teach your employees how to use the P.A.S.S. procedure and the right extinguisher for each kind of fire. The confidence of gaining the proper knowledge through this video can help the panic and confusion usually common to most fire emergencies.

#### **FIRE PREVENTION**

12:00 minutes

This program presents video of real fire fighting situations, and educates workers on how to identify potential fire sources, as well as steps to take to prevent fires from happening in the first place. The video also teaches workers to operate a wide variety of fire extinguishers and how to assist in the event a fire develops. Other topics include:

- Proper handling and storing of flammable liquids
- **Evacuation procedures** •
- Fire prevention measures •
- Good housekeeping •
- Best safety practices

# FIRST STEP

5 minutes

This is the story about how one wrong step, one wrong action can change your life forever. Candace Carnahan, a young college student, worked summers at a paper mill in her home town. She had worked at the mill three years and was comfortable with the work and familiar with the environment. She was so familiar that she thought nothing of taking an often used shortcut stepping over a conveyor system that ran at floor level. But one day she stepped too short, catching her foot in the conveyor and eventually losing her left leg from the knee down. Candace dramatically describes this tragedy and the safety lessons she learned from it. Her story will help your employees realize that the first step to not being injured is knowing that you can be injured.

### FORKLIFT FUNDAMENTALS: GET THE FACTS (1997)847cc/sp/dvd

#### 21:00 minutes

Familiarize your workers with the basics of safe forklift practices with this enlightening program. Topics include: Powered industrial trucks, power plant inspections, and equipment inspections.

#### FORKLIFT OPERATIONS: CARRY THE LOAD (2007)916

20:00 minutes

Reduce the risk of forklift accidents with this valuable program. Topics covered include: operating conditions, vehicle and pedestrian traffic, special hazards, proper load manipulation, and special conditions such as narrow aisles or restricted areas.

#### FORKLIFT OPERATIONS: SAFETY DRIVEN

16:48 minutes

Nearly 100 workers are killed in forklift accidents each year and another 20,000 workers are seriously injured (Bureau of Labor Statistics). To prevent accidents from occurring, OSHA mandates that every forklift operator must be properly trained and certified before using the equipment. Employers can prevent costly accidents and injuries by teaching drivers to recognize hazards and follow proper operating procedures with this training program. This program covers:

- Daily Inspections
- Maintaining Stability
- Driving a Forklift
- Handling Loads

### FORKLIFT OPERATOR SAFETY AND TRAINING

#### 17 minutes

There are 855,000 forklifts in the United States, 11% of which will be involved in an accident. That is almost 95,000 vehicles involved in an accident next year alone, not including forklifts involved in more than one accident. This forklift safety video tries to make sure that your employees don't become part of that statistic. The topics covered in this forklift training film video include: engineering principles, knowing the load center and capacity of your forklift, understanding stability (both latitudinal and longitudinal), and how to increase your chances of surviving a turnover.

# FORKLIFT OPERATOR TRAINING (1998)

1009

1033 CC/Sp/ DVD

CC/Sp/

DVD

DVD

1003

Powered industrial trucks are a necessary part of most industrial operations. They can be found in a variety of sizes and models, and many of them can be fitted with attachments for performing specialized tasks. These valuable machines are truly an extension of ourselves, but their proximity to people and property in the plant always presents potential hazards. If forklifts are used incorrectly, the resulting accidents can injure or kill operators and pedestrians and cause tremendous property damage. To prevent these accidents, operators must know, understand, and follow all safe work procedures. Steering and maneuvering, use of special attachments, vehicle capacity and stability, vehicle inspection and refueling procedures are all subjects featured in this video. Other topics include moving loads, pedestrian traffic, types of lift trucks and hazardous work surfaces.

<b>FORKLIFT OPERATOR TRAINING (1998)</b> 8:00 minutes Concise version of above title.	1020	CC/	DVD
FORKLIFT SAFETY 16:00 minutes	1011	CC/	DVD

Designed for employees responsible for operating forklifts in agriculture settings. Explains engineering principles, safe operating rules, forklift maintenance, and more.

#### FORKLIFT SAFETY: BASIC ORIENTATION

13:22 minutes

Because of their size, weight, and the loads they carry, forklift accidents can cause serious injury and property damage; in fact, forklift operators are the only workers who have a greater risk of injury and death on the job than driving to and from work.

This program was filmed at multiple job sites showing forklift use in a variety of everyday situations. You're sure to see footage of a work environment similar to your own - which helps your workers relate the important safety messages in this series to their specific jobs.

Forklift Safety: Basic Orientation covers pre-operation procedures to ensure your forklifts are good-to-go.

- Pre-operation inspection
- The parts of a forklift
- Safe operation.

#### FORKLIFT SAFETY: BEST OPERATING PRACTICES859

12:00 minutes

Facilitator's guide included.

Best safety practices for moving loads throughout the work environment – through different conditions, surfaces, and around obstacles. Topics include hazard awareness, pedestrian traffic, load handling techniques, stability triangle, and driving skills.

#### FORKLIFT SAFETY: OPERATING SAFELY

That's why it is critical to understand the new requirements for handling hazardous chemicals that started May 2 to 2015. This program ensures that your workers understand how these chemicals safely, regardless of their origin, by covering:	v global 25, 2012	complia and cor	nd forth across ince ntinues through

Safety Checklist **GOOD BACK, BAD BACK** 934 CC/ DVD 20:00 minutes Quickly and effectively teach your employees positive back protection behavior. Use this energetic, memorable approach that all viewers till understand and be motivated to implement at work, and at home. The program teaches four simple, memorable tips: Preserve the Curves, Build a Bridge, Keep It Close, and Lock & Lift. **GRAIN ELEVATOR HOUSEKEEPING** 531 VHS 6:17 minutes Summarizes cause of grain elevator explosions; neglect of day-to-day housekeeping; points out critical dust area. Illustrates the need for written housekeeping program; and describes regularly scheduled inspections needed to avoid explosion. **GRINDER & ABRASIVE WHEEL SAFETY** 709 VHS 14:00 minutes Avoid dangerous disintegration of wheels and encourage safe use of equipment. Abrasive wheel storage, inspection, mounting, use. Portable and bench grinders: safety tips, storage, use, PPE and maintenance. **GROUNDSKEEPING SAFETY: BE A PRO (2008)** 705 DVD Sp/ 17:00 minutes Teaches how to avoid unnecessary accidents by thinking: safe? or sorry? Topics include: personal protective equipment, general checklist for safety, tractors, riding mowers and push mowers, trim and brush-cutting equipment and blowers, checklist for hazardous materials. HAND INJURY PREVENTION - IN TOUCH WITH SAFETY 699 CC/Sp/ DVD 16:20 minutes Explains the potential hazards to which hands are exposed every day. Trains workers to avoid hand injuries and reduce associated costs of lower productivity and insurance claims. HAND AND POWER TOOL SAFETY 931 CC/Sp/ DVD 19:45 minutes Facilitator's Guide included. Because we use hand and power tools on a regular basis, many workers forget the potential hazards. This program puts safety at the forefront of common tasks. Carelessness, poor housekeeping and misuse often lead to accidents and injuries that range from cuts and bruises to amputations. HAND PROTECTION: 966 Sp&P/ DVD **LESSONS FOR A LIFETIME (1995/2004)** 15 minutes Give your workers the upper hand when it comes to hand safety. They'll watch workers recount their gripping experiences with hand injuries and learn how their mishaps - involving tools,

What is the GHS?

Safety Data Sheets

**GHS** Labels

•

•

•

machines, ergonomics and electricity - occurred. Help them understand the different glove types:

what they are, how they are used, and when they are used. Topics covered include hazard assessment, machine hazards, electrical hazards, and PPE.

#### HAND SAFETY: IT'S IN YOUR HANDS (2006)

#### 15 minutes

Some ways hands can be injured include pinched, burned, irritated, cut, and sliced. Get a firm grip on hand safety and prevent these accidents. Avoid the two types of hazards - machine and chemical - and understand the factors that determine the ideal PPE for a job. Make sure employees know the glove types when they are used - leather, fabric and insulating gloves - and how they are to be checked, inspected, and cared for. Topics covered: wearing the right hand protection, using machine guards, using the right tool for the task, keeping equipment in proper working order, and taking good care of gloves.

#### HAZARD COMMUNICATION

8:38 minutes

This video will make you aware of some of the hazardous substances common to construction jobsites and educates you about proper handling procedures, use, and storage of these substances in the workplace. It also outlines what should be included in a complete hazard communication program.

#### **HAZARD COMMUNICATION (1995)**

13:20 minutes

Step-by-step program emphasizes the right-to-know compliance for all employees. Train employees on the hazard communication requirements, including common terms and how to prevent exposure, labeling systems and material safety data sheets, safe handling of hazardous materials, differences between common hazardous materials, and how to reduce or eliminate exposure.

#### HAZARD COMMUNICATION: BEHIND THE SCENES (2006) 1000 DVD

18 minutes

This is an entertaining new video that covers the key elements of Hazard Communication training for workers in general industry. This is a HazCom video that will keep the viewers attention and give them important information. It's filled with surprising special effects and attention-grabbing illustrations. Behind the Scenes addresses the following information: roles and responsibilities of employers and employees in the development and implementation of a workplace Hazard Communication plan; physical and health hazards chemicals can produce; different ways chemicals can enter our bodies; called routes of entry; important information found on chemical labels; overview of information found in Material Safety Data Sheets; and chemical safety around the home.

#### HAZARD COMMUNICATION FOR CONSTRUCTION (1995) 724 cc/ vhs

#### 12:00 minutes

Outlines how to control chemical hazards on the construction site by using the Hazard Communication Standard. Includes recognizing potential construction site hazards, safety precautions and equipment, and written hazcom program.

## HAZARD COMMUNICATION EMPLOYEE TRAINING:150 cc/WHAT'S WRONG WITH THIS PICTURE

17:00 minutes

Examples of correct and incorrect chemical safety procedures are reenacted in a wide variety of work settings. Technical terms found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations.

#### HAZARD COMMUNICATION -A HEALTHY RESPONSIBILITY (1989)

#### 236 CC/Sp/VHS

925

924

CC/

CC/Sp

DVD

DVD

19 minutes

The hazard communication standard states that you have a right to know the dangers of any hazardous chemicals you work with and you have a right to be trained on how to protect yourself from these dangers. The standard covers:

- Identifying hazardous chemicals
- Product warning labels
- Material safety data sheets (MSDS)
- Written hazardous communication program, and
- Employee training.

#### HAZARD COMMUNICATION: INFORMED FOR SAFETY 1032 CC/Sp DVD

15:02 minutes

This program informs workers of the risks of hazardous chemicals and how to protect themselves. This attention grabbing program follows a step-by-step process making it easy to understand the necessary precautions to prevent hazardous injuries caused by dangerous chemicals at any worksite. This program will address:

- Potential injuries resulting from hazardous chemical contact
- Material Safety Data Sheets
- Container labels
- Best safety practices for working with chemicals

#### HAZARD COMMUNICATION FOR

#### **PUBLIC EMPLOYEES (2007)**

15 minutes

It's safe to be informed, especially on dangerous chemicals. This important training program will provide your employees with elementary knowledge of substances, what they are and how to work with them safely. With this resource, you can comply with OSHA standard 1910.1200 and keep all your workers safe.

- Physical and health hazards
- How exposure occurs
- PPE
- MSDS

#### HAZARD COMMUNICATION RIGHT-TO-KNOW

#### 10 minutes

Comply with retraining requirements for 1910.1200 and give your employees a clear message: "Don't neglect chemical dangers on the job!"

#### HAZARD COMMUNICATION: THE ROAD TO SAFETY (1995) 712 CC/sp/vhs

#### 16:00 minutes

Help employees identify hazards. Topics include: Identifying potential hazards, Warning labels, Material Safety Data Sheets (MSDS).

#### HAZARD COMMUNICATION: SIGNS OF SAFETY

DVD

13:00 minutes

Facilitator's Guide included.

Keep your employees safe and well educated about chemical hazards with this video. Your employees will learn: labeling systems and material safety data sheets; safe handling of hazardous materials; differences between common hazardous materials; and how to reduce or eliminate exposure.

#### HAZARD RECOGNITION: OUT OF THE ORDINARY 817 cc/sp/ dvd

12:50 minutes

This video uses optical illusions to capture the audience's attention and applies the principles of observation to train your employees to recognize and respond to hazards in the workplace. After they learn how to recognize potential hazards, they can be trained to eliminate incidents and accidents. This video educates workers about different types of hazards commonly found in the workplace. This video also demonstrates how workers should use all of their senses to recognize and prevent hazards.

## HAZCOM AND THE GLOBAL HARMONIZING SYSTEM: 1068

## EMPLOYEE TRAINING

23 minutes

Upcoming changes in OSHA's Hazard Communication Standard will bring the regulation more in line with international standards with the implementation of the Global Harmonizing System. Implementing the Global Harmonizing System, or GHS, helps ensure improved quality and consistency in the classification and labeling of all chemicals, which in turn improves an employee's ability to quickly understand critical safety information. This program is designed to help employees understand the three key elements of the GHS: Hazard Classification, container labeling and Safety Data Sheets. Topics include the written Hazard Communication plan, physical and health hazard classes, pictograms, signal words and other information found on GHS container labels and Safety Data Sheets.

#### **HEALTHCARE ERGONOMICS:**

### WORKING TO YOUR ADVANTAGE (1996)

21:00 minutes

Cumulative trauma disorders are the fastest growing category of occupational injuries in the United States. This program will help you identify ergonomic hazards in your work area and focuses on the prevention of the most common injuries you will face as a healthcare worker. Topics include:

771

234

CC/

CC/Sp/

VHS

- Recognizing cumulative trauma disorders
- Preventing back injury
- Identifying ergonomic hazards

### HEARING CONSERVATION:

WHAT DO YOU WANT TO HEAR?

15:50 minutes

Facilitator's Guide included.

Each year thousands of workers suffer irreversible, noise-induced, hearing loss in the workplace. Most are the result of cumulative exposure to high levels of noise. Learn to prevent hearing loss

and the associated costs at your company by creating an awareness and respect for noise hazards and motivating employees to protect their hearing. Hearing loss is 100% preventable.

#### HEARING PROTECTION: IT MAKES SENSE (2004) 943 CC/Sp&P/ DVD

22:00 minutes

Don't let employees run the risk of losing their hearing. Teaches employees how the noise at work can be controlled and how they can protect themselves from hearing loss. Includes: the human ear, preventing hearing loss, audiometric testing, engineering and administrative controls, and PPE.

#### **HEARING PROTECTION: SOUNDS GOOD TO ME (2008)** 769 CC/Sp&P&F/VHS/DVD

#### 14:00 minutes

Noise-induced hearing loss creeps up on you. There are no signs – no pain. This DVD will show you how to work with your employer to safeguard one of your most important senses. You will learn how noise exposure affects your hearing, and how, when, and where to use hearing protection.

#### HEAT STRESS

17:00 minutes

After viewing this video you will be able to explain: How heat affects the body and can lead to heat stress; how to prevent and treat symptoms of heat rash and heat cramps; Why symptoms of heat exhaustion and heat stroke are so dangerous and how employees should respond to victims with these symptoms; why it is important to become acclimated to hot work environments; and what general precautions everyone can take to help prevent heat stress.

#### HEAT STRESS: CODE RED (2008/2009) 969

#### 15 minutes

Heat stress, heat stroke, heat rashes, heat cramps – all are dangerous to your employees. This training DVD will give them the knowledge they need to avoid the dangers of working in hot, humid conditions. Topics covered: acclimatization, hydration, proper clothing, and signs of heat fatigue.

#### HEAT STRESS: DON'T LOSE YOUR COOL (2000/2008) 970 DVD Sp&P/

15 minutes

This program provides a no-nonsense approach to heat stress and teaches how to prevent and treat heat disorders. Topics covered are: Sunburn, acclimatization, heat rash, exhaustion, stroke, clothing, fluid intake, and eating habits.

#### HEAT STRESS: THE HEALTHY APPROACH **982**

#### 14:28 minutes

Working in hot environments puts stress on your workers and can lead to significant health problems including heat exhaustion, heat cramps and other more serious heat related conditions. This video will show your workers how to manage hot conditions and how to recognize heat related illnesses.

HEAT STRESS FOR PUBLIC EMPLOYEES –	968	Sp/	DVD
SEEING RED (2008)

#### **HEXAVALENT CHROMIUM AWARENESS (2006)**

17:00 minutes

OSHA has revised its standard concerning permissible exposure limits for HexChrom. Make sure your workplace is up to date and your workers are aware of the risks of exposure to and the health hazards associated with HexChrom. Protect your workers from lung cancer, permanent eye damage and skin ulcerations with this new, high-impact training program.

#### HIGH IMPACT: "QUALIFIED" ELECTRICAL SAFETY 894 CC/ DVD

#### 20:00 minutes

This dynamic video shows viewers that a commitment to electrical safety is the key to maintaining an injury-free workplace or even saving one's life. Filled with re-creations of actual accidents from OSHA files, this film has proven to be a highly effective training tool through its scared-straight, graphic nature. Includes electrical shock, burns, and arc flash.

#### HIGH IMPACT: FORKLIFT SAFETY

19:00 minutes

This dynamic video shows viewers that a commitment to forklift safety is the key to maintaining an injury-free workplace or even saving ones life. Filled with re-creations of actual accidents from OSHA files, this film has proven to be a highly effective training tool through its scared-straight, graphic nature.

#### HIGH VOLTAGE SAFETY: SAFE WORK PRACTICES – Part 2 860 cc/ vhs

14:51 minutes

This program discusses safe work practices including:

- Lockout/tagout
- Regulatory and best practice requirements, and
- Emergency procedures.

#### HOISTS & SLINGS

14:45 minutes

Hoists and slings create the potential for serious accidents. This video will assist in training workers on proper sling inspection, selection and use to prevent material lifting accidents at your site. Types of hoists featured include: hand operated; air or electric powered wire rope; electric chain operated; and vacuum powered.

#### HOUSEKEEPING AND ACCIDENT PREVENTION 1051

#### 14 minutes

Maintaining good housekeeping in the work area can significantly reduce accidents and injuries in any type of work environment. By developing good safety habits, and by being aware of their work environment and any hazards associated with it, employees can help to create a much safer workplace. This program demonstrates to employees how to prevent workplace accidents by paying attention to safety housekeeping considerations.

#### HOUSEKEEPING: IT AIN'T LIKE THE MOVIES (2005)

DVD

15:00 minutes

Review importance of good housekeeping and what to look for in your facility. Topics: clean or clutter, proper storage, eliminate spills, and leaks.

### HOUSEKEEPING SAFETY: MAKING BEDS SAFELY

6:00 minutes

It may not seem obvious, but making a bed can pose many possibilities for injury. Bending improperly, lifting more weight and bulk than is safe, tripping over bedding on the floor: these are examples of common housekeeping mistakes that are discussed in the video. With a heightened awareness of proper techniques, your staff will be encouraged to perform this task safely.

#### HUMAN BEHAVIOR: REDUCING UNSAFE ACTS (1992) 201 VHS

15:00 minutes

Statistics determine that the overwhelming cause of most industrial accidents can be attributed to unsafe acts of employees. This program enables you to better understand unsafe acts and how they contribute to accidents and injuries.

#### I CHOSE TO LOOK THE OTHER WAY

10:00 minutes

This video tells the story of an employee who failed to speak up when witnessing an unsafe act and by choosing to "look the other way," he allowed the needless death of a co-worker to occur. This powerful program shows how "speaking up" about unsafe acts can save lives and help to develop a positive safety culture.

#### **INCIDENT INVESTIGATION**

16:25 minutes

Train your employees how to conduct the step-by-step procedures to investigate accidents and near misses.

#### **INDOOR CRANES: SAFE LIFTING OPERATIONS (1991/2008)** 971 DVD Sp&P/

19:00 minutes

This valuable program provides non-licensed operators with the information they need to safely operate several types of cranes. Topics covered are: Rigging techniques, lifting and moving.

### **INDUSTRIAL ERGONOMICS**

15:00 minutes

Most of the time, individual workers cannot do much about designing equipment or tools. Training, however, can prevent injuries that are a result of an improper fit between the person and the job. This live-action program covers several aspects that include learning about human body mechanics, how to work with equipment and tools designed for most people, and how to apply sound ergonomic principles to prevent fatigue, stress and injury while working in an industrial environment.

INDUSTRIAL HOUSEKEEPING (1989)	516	VHS
16:00 minutes		

6:00 minutes

The cycle of unpleasant, dangerous and unproductive consequences of poor housekeeping on and off the job can be broken for all employees as it was for the three manufacturing employees in the program who learned to:

- Limit work and production supplies to work areas.
- Keep walkways and working surfaces clean.
- Clean up spills immediately.
- Store tools properly.
- Store/dispose of flammable/combustible materials.
- Practice other techniques for preventing unsafe conditions.

#### INFECTION CONTROL: Q & A

18:31 minutes

This video answers infection control questions from various departments within a hospital: (1) universal precautions; handling of infectious waste; (2) tuberculosis; isolation procedures; respirator masks; (3) handwashing; staphylococcus aureus; and (4) exposure control plans.

675

4:20 minutes

Viewers won't forget the powerful accident re-enactments and dramatic consequences illustrated in this motivational video. It's a great opener for any safety topic!

#### IT WON'T HAPPEN TO ME:

ACCIDENTS IN THE WORKPLACE (1987) 622 VHS 15:00 minutes

Discusses the major factors that cause accidents and why people take safety risks.

#### IT'S UP TO ME

1031 Sp&P/ DVD

14 minutes

Like its predecessor "I Chose to Look the Other Way", this program is based on another popular poem by Don Merrell. Its powerful safety message is brought to life through the combination of program and poetry.

- Scenarios are meshed with the poem to deliver the message: *I want a workplace that's injury free and if that's going to happen, then it's Up To Me.*
- The program makes it clear to viewers not to "assume" that someone else will fix a problem.
- Several vignettes depicting both the wrong and right ways to respond to unsafe conditions.
- Complete poem with narration at the end of the program.

#### **JOB SAFETY ANALYSIS (1998)**

17:30 minutes

Facilitator's guide included.

This JSA program will make a difference in your safety program. It takes a proactive approach to incident prevention.

#### JUST THAT ONE TIME

15:15 minutes Some people are chronic risk-taket

Some people are chronic risk-takers. Others behave dangerously just one time. But the end results can be just as disastrous, as this film shows.

W	
<b>LASER SAFETY: THE BLINK OF AN EYE (2007)</b> 20 minutes	1063	Sp&P/ DVD

Deflect the accidents and blast away the hazards. This program aims to provide basic laser safety awareness. While your workers do abide by your safety guidelines, this program supplements your accident-prevention efforts. The program, based on the current and up-to-date American National Standards Institute (ANSI) standard Z136, illuminates a deeper understanding of:

- The various other standards and guidelines that may be associated with their work
- Hazardous situations when working around lasers •
- Air contaminants produced by laser operations •
- The classification of lasers •
- What role the Laser Safety Officer plays •
- Engineering and Administrative controls •
- How to protect your eyes •
- The importance of laser safety training. •

#### LEAD SAFETY

#### 10:37 minutes

This is ideal for construction, chemical, manufacturing, petroleum, maintenance, and utility employees exposed to lead on the job. Filmed in multiple industrial and construction locations, this program motivates workers to follow best safety practices that reduce the concentration of airborne particles and eliminate the potential for overexposure. Video covers: how lead enters the body, effects of overexposure, preventative measures and safe work practices, requirements for regulating an area, and why and how preventive measures/controls are used.

#### **LEAD SAFETY ON THE JOB (2007)**

This program helps your facility comply with OSHA's Lead in Construction Standard (1926.62). It examines the ways lead can enter the body, its symptoms, and its effects. Protect yourself and your employees from dangerous lead exposure. Information includes:

- Inhalation and ingestion •
- Health risks
- Blood lead level (BLL)
- Action level vs. permissible exposure limit (PEL) •
- Engineering, work practice, and administrative controls
- Work management practices

#### LEAD – TREAT IT WITH RESPECT (1998)

#### 17:00 minutes

Teaches your employees how to recognize and reduce exposure to lead, lead's long term health effects, how lead enters the body and what employees can do to protect their families.

#### **LEADING INDICATORS: IT'S THE LITTLE THINGS** 1069 DVD

#### 27 minutes

The worst aviation accident in history occurred in 1977 when two 747 jets collided on the island of Tenerife, killing 583 people. Just like hazardous situations that lead to injuries in the workplace, there were several "leading indicators" or warning signs preceding the collision that warned of impending danger. In this presentation, fighter pilot and safety speaker Jeff "Odie" Espenship discusses the three leading indicators that led to this tragedy and encourages viewers to slow down, re-plan and refocus when these warnings appear in our workplaces.

#### 910 CC/Sp/ DVD

#### 927 DVD

#### LESSONS FROM GROUND ZERO:

#### 29:00 minutes

This video introduces some of the experts who were called on to protect the dozens of rescuers working in potentially deadly conditions at Ground Zero. It shows how a well-conceived Emergency Action Plan helped avoid the loss of additional lives during the rescue and cleanup efforts. Workers will learn about:

- Proper emergency site control.
- Safe crane and hoisting operations.
- Importance of proper PPE and respiratory protection.

#### LESSONS FROM GROUND ZERO: EVACUATION (2002) 776 CC/ VHS

#### 23:00 minutes

This video provides first-hand accounts from those who experienced the World Trade Center evacuations in February 1993 and September 2001. It shows how critical changes implemented after the 1993 bombing expedited the evacuation on September 11th, and allowed more than 18,000 people to evacuate in less than two hours — four hours faster than in 1993. Hear about the:

- Importance of evacuation plans and fire drills.
- Proper use of fire extinguishers.
- Necessity of working radios, operational flashlights, fully stocked first aid kits and accurate building maps.

#### LESSONS LEARNED FROM AN ARC FLASH TRAGEDY 801 VHS

19:00 minutes

In this video your employees will learn lifesaving lessons about understanding all hazards of a job task and taking the necessary precautions to protect yourself. Topics include always following safe electrical work practices, the dangers of complacency when performing electrical work and the purpose of an arc hazard analysis. It will also explain the reason for arc flash regulation and the various clothing and personal protection required by hazards zero through four.

#### LESSONS LEARNED FROM HAND INJURIES

1029 DVD

19 minutes

From our earliest moments, we use our hands to learn, to explore and to interact with the world around us. Now, as working adults, our hands continue to be "out front," touching, grasping, pushing, pulling and lifting our way through work and through life. Unfortunately, being "out front" can also mean being placed in danger, and sometimes things go wrong. This program features reenactments of workplace hand injury scenarios to teach valuable safety lessons.

- Causes and effects of hand injuries
- Selection and use of protective gloves
- Nip points and entanglement hazards
- The use of assist devices
- Using hand and power tools safely
- Preventing Cumulative Trauma Disorders.

## LETHAL STRIKE: PROCEDURES FOR PROPERLY

#### MANAGING INJECTION INJURIES

15:00 minutes

This video focuses on the correct pre-hospitalization management of injection injuries. Highpressure injection injuries are becoming increasingly prevalent. It covers:

- Typical cause of injection injuries.
- What to do if you suffer an injection injury
- How to properly manage the victim of an injection injury.
- What NOT to do if you become the victim of an injection injury.
- How to make sure the victim receives the proper medical treatment.
- Bonus feature: Interview with a hand surgeon (5 minutes) & interview with a medical doctor (5 minutes)

#### LIFE & DEATH: ELECTRICAL SAFETY

893 CC/ DVD

1083

DVD

DVD

19:00 minutes

This video has a very unique approach where it starts on the scene of an accident and works backwards. With the characters and audience playing the part of an accident investigator, they use the clues to solve the mystery of how the incident occurred. This film has proven to be a highly effective training tool through its scared-straight, graphic nature.

#### LIFTING SAFELY: CRANES, CHAINS, SLINGS AND HOISTS 1084

11:00 minutes

Pendant, or hand controlled, overhead cranes or hoists are one of the most useful aids for material handling in the workplace today. This is an excellent crane safety training program for anyone using overhead cranes/jib hoists. Every person who works near or with cranes should understand the basic safety rules. Designed for anyone operating hoists or cranes, this OSHA crane safety video explains sling angles, safety techniques, crane rigging safety and inspection procedures. Anyone operating this equipment must be trained, so this crane safety video meets OSHA training requirements.

#### **LISTENING SKILLS (1986)**

532

VHS

4:09 minutes

When people talk, do we really listen? When it comes to safety, we can't afford not to listen. This program covers four steps to good listening: hear what is being said, understand it, evaluate it, and respond with words or body language.

LOCKOUT / TAGOUT OF ENERGY SOURCES (1989)	956	CC/ VHS
Spanish only	714	Sp/VHS

#### 27:00 minutes

Help your company comply with OSHA 1910.147 and avoid catastrophic accidents. Topics include: hazards of uncontrolled energy, when to lock and tag, Equipment shutdown and isolation, control of stored energy.

LOCKOUT / TAGOUT: AN OPEN AND SHUT CASE (2004)	911	CC/Sp/	DVD
14:00 minutes			

Reinforcing the basics of lockout/tagout will help you comply with OSHA's 1910.147 standard and avoid catastrophic accidents.

- What lockout/tagout is and when to perform it.
- OSHA's six steps to controlling hazardous energy.
- OSHA's three steps for the safe restoration of energy.

#### LOCKOUT / TAGOUT PROCEDURES: KEY TO SAFETY

13:00 minutes

Many tragic on-the-job accidents occur because proper lockout procedures are not followed in repairing and adjusting equipment.

#### LOCKOUT/TAGOUT PROCEDURE: KEY TO SAFETY 543 DVD

9:00 minutes

This program teaches:

- why proper procedures must be followed
- steps required to shut down and re-energize and
- special situations, i.e. group lockout and working with contractors.

#### LOCKOUT/TAGOUT: REAL, REAL LIFE (2004) 912 Sp&P/ DVD

18:00 minutes

Be sure your employees are familiar with safe locking and tagging practices with this training program. This program will keep in you in compliance with OSHA's Lockout/Tagout standard. Topics include: awareness, attitude, action, when, where, why, and proper lockout/tagout procedures.

#### LOCKOUT/TAGOUT SAFETY

13 minutes

This lock out tag out video starts out with an example of how easily a problem can develop when proper lockout/tagout procedures are not followed. This lockout/tagout program covers the step by step process for acceptable locking and tagging procedures and it has plenty of examples and beneficial suggestions to make the process easier (such as different colored locks for different people or groups).

MACHINE GUARD AWARENESS (2008)	998	CC/Sp/VHS/DVD
16:21 minutes		
Facilitator's guide included.		

Moving machine parts, when unguarded, have the potential to cause severe workplace injuries, such as crushed fingers or hands, amputations, burns, or blindness.

#### **MACHINE GUARDING (1992)**

14:00 minutes

Workplace injuries and deaths occur because a machine was never safeguarded or the guard was removed. Workers must understand and use the best form of protection - machine safeguarding. This video includes the following topics: categories and types of machine guarding; explanation of how machine guarding works; importance of safeguarding; places where most machine hazards occur; and safety control devices.

#### MACHINE GUARDING: SAFEGUARD YOUR FUTURE (2008) 972 Sp&P/ DVD 24 minutes

VHS

DVD

DVD

1028 cc/

720

CC/

Practically every machine has some sort of machine guard – a shield, automatic shutoff or even a laser curtain – to protect workers if a body part should come in contact with the machine. Make sure your employees understand the importance of knowing about and using the machine guards meant to protect them. Topics covered: What are machine guards, machinery hazards, protection from hazards, safe work practices, safety guards and devices.

#### MACHINE LOCKOUT: CONTROLING HAZARDOUS ENERGY 553 vhs

#### 21 minutes

All of the steps required to make certain a machine could not possibly cause injury during maintenance and servicing. Making a machine safe to work on requires two things: disconnect and lockout any energy powering the machine; and dissipate or control any residual energy remaining in the machine.

#### MACHINERY & MACHINE SAFEGUARDING (2003) 799 VHS Spanish only 798 Sp/VHS

#### 18:00 minutes

Safeguards are essential for protecting workers from needless and preventable injuries such as crushed hands and arms, severed fingers, and blindness. Safeguarding is the application of safety, engineering, work practices and administrative controls to prevent injury to employees who operate machines or who are in the vicinity of machine operations. This program covers the many ways to safeguard machinery and shows a wide variety of machine safeguarding techniques available.

## MACHINES, OPEATORS AND GUARDS:

### **REAL ACCIDENTS, REAL STORIES**

#### 14:30 minutes

This video covers the importance of machine guarding. It also covers several real machine guard accidents that resulted in serious injury or death. Viewers will learn the appropriate OSHA regulations and why they exist.

### MAKE IT SAFE

An injury prevention program for Hispanic farm families covering:

- Emergencies. Identify emergency situations & basic steps for handling emergencies effectively and efficiently.
- Safety Around Animals. Learn to identify different types of dangers associated with both tame & wild animals.
- Human Factors. Promote positive safety attitudes and behaviors through interactive instruction on basic injury control principles.
- Signs & Symbols. Identify and understand the meaning of safety signs and symbols.

### MAKING IT FIT: IMPROVING OUR OFFICE COMFORT 1066 DVD

### 15 minutes

A desk, a chair, a phone, a monitor, a keyboard and a mouse are the standard working tools of millions of people. But these simple tools can take their toll when we don't fit the equipment to the physical needs of the office worker. This program covers ergonomics in the office environment and how to avoid the fatigue, strain and stress that can result from the poor office setup.

#### 16:00 minutes Supervisors or safety team members will appreciate this lighthearted approach to learning about how to conduct a JSA. Topics covered are criteria for selection, breaking the job into steps, identifying the hazards for each step, and developing procedures to eliminate hazards. MANAGING THE IMPACT OF WORKPLACE 1071 DVD EMERGENCIES AND DISASTERS 35 minutes This program describes strategies to: design a crisis management program; reduce traumatic reactions in employees; and deploy crisis teams to manage the impact of industrial accidents, violent incidents, disasters, and traumatic events. **MASTER DRIVER: BACKING TECHNIQUES (2004)** 951 CC/ VHS Covers the basic elements of backing, types of backing maneuvers, common errors and problem areas. It also reminds drivers that getting out of their cabs and looking for hazards 0 on all sides, above and below their rigs as well as behind – is one of the simplest, yet most effective, ways to ensure a safe return every time, every run. **MASTER DRIVER: DRIVING TECHNIQUES (2004)** 950 CC/ VHS Reviews the proper approach to turns, merging, changing lanes, passing, low underpasses, and railroad crossings. Introduces defensive driving to new drivers, and serves as a wake-up call to complacent veterans. MASTER DRIVER: EXTREME WEATHER DRIVING (2004) 949 CC/ VHS Provides guidelines for driving safely in potentially deadly conditions such as snow, ice, rain, fog, and high winds. **MASTER DRIVER: NIGHT DRIVING (2004)** 948 CC/ VHS Discusses driver, vehicle, and roadway factors such as reduced vision, glare, fatigue and impaired drivers that can lead to nighttime incidents and crashes, and provides safety guidelines for driving between sunset and sunrise. **MASTER DRIVER: SPEED & SPACE MANAGEMENT (2004)** 947 CC/ VHS Covers driving too fast, driving too fast for weather and road conditions, following and stopping distances, handling tailgaters, and how thoughtful speed and space management affects your ability to perceive and deal with hazards. It also drives home the costs – all the costs – of excessive speed and failing to maintain an appropriate space cushion.

730

VHS

# MASTER DRIVER: VEHICLE INSPECTIONS (2004) 946 cc/ vHs Covers required and recommended inspections, a standard procedure for doing them, and the driver's vehicle inspections report (DVIR). 946 cc/ vHs

#### MATERIAL SAFETY DATA SHEETS: READ IT BEFORE YOU NEED IT (2004) 20:00 minutes

MAKING OF JSA, THE: JOB SAFETY ANALYSIS (1988)

This video will help your employees use and understand the MSDS and in so doing help to control the chemical hazards. Topics include: product information; exposure situations; hazard

718

CC/Sp/

prevention and personal protection; toxicology, ecology and disposal; transportation; and regulatory information.

## **MECHANICAL POWER PRESS SAFETY:**

#### **DON'T PRESS YOUR LUCK (1996)**

19:00 minutes

This video will motivate your workers to follow proper safety procedures, help you comply with mechanical power press safety regulations and review safety tips for operators. Topics include: types of presses; safeguarding devices; safely operating a press; and inspections and maintenance.

VHS

#### METHYLENE CHLORIDE INFORMATIONAL VIDEO (1998) 844 VHS

#### 12 minutes

Provides background on the methylene chloride standard. Describes typical uses and health effects of methylene chloride. Provides information on how to protect yourself during an inspection at a facility that uses methylene chloride.

### MIOSHA: YOUR WORKPLACE PARTNER

12:00 minutes

This video, produced by MIOSHA Occupational Health and Safety Education and Training Divisions, features six Michigan companies who have successfully used MIOSHA onsite consultation services. An effective safety and health program can help you prevent injuries, illnesses and accidents - and at the same time, help save you money. The onsite consultation program is part of a complete series of MIOSHA services to help companies with their safety and health practices.

#### MRSA AWARENESS (2008)

There is widespread concern over the risk of exposure to the deadly MRSA infection. This staph infection is not confined to hospitals anymore and has become a new threat known as community-associated MRSA. Help your employee protect themselves and their families with the information on how exposure occurs and the best ways to protect themselves in this timely training program. Includes:

- What is MRSA
- How is it spread
- Symptoms of infection
- Prevention exposure

#### NO INJURY/NO ACCIDENT

#### 15:00 minutes

Zeros in on an often neglected safety area - near misses and insignificant incidents that result from unsafe acts and conditions that can cause major accidents and serious injuries.

NOISE INDUCED HEARING LOSS:			
NO SECOND CHANCE (1992)	195	CC/	VHS
20:00 minutes			

Features interviews with employees suffering hearing loss to send a powerful message to workers on wearing hearing protection. Explains the ear, effects of noise exposure and the steps to an effective hearing conservation program.

#### NURSING HOMES: HAZARDS & SOLUTIONS (2001) 762 CC/ VHS

#### 16:00 minutes

This video discusses the ergonomic hazards, primarily back injuries, associated with resident transfers. Techniques to minimize resident transfer hazards to both the nursing home resident and to the nursing home employee are provided. The video also describes OSHA's strategic plan for reducing injuries and illnesses in long-term care facilities.

#### **OFFICE ERGONOMICS: IT'S YOUR MOVE (2001)** 760 CC/

#### 16:00 minutes

Most employees do not associate the office environment with risk of injury. Yet musculoskeletal disorders (MSDs) are the fastest growing workers' compensation cost for businesses. The goal of ergonomics is to fit the job to the worker, not the worker to the job. Superior, high-resolution graphics help explain how the musculoskeletal system works and how to limit injury. This video identifies:

- Causes and types of MSDs
- Proper posture and body mechanics •
- Workstation design factors. •

#### **OFFICE ERGONOMICS TODAY**

#### 16:35 minutes

Facilitator's guide included.

The techniques and best safety practices featured in this program will teach your workers the causes of Musculoskeletal Disorders (MSDs) and motivate them to follow safe work procedures to reduce their exposure to risk factors. The training covers: definition of ergonomics, ergonomic risk factors, recognizing and respecting early warning signs, proper posture, and effective ways to prevent injuries.

#### **OFFICE SAFETY: IT'S A JUNGLE IN THERE (2001)** 1013 CC/Sp&P&F/

#### 20:00 minutes

Every year, about six million people get hurt at work. And more than 400,000 are just like your employees...they work in offices fraught with hidden and tricky dangers. This program shows how to cope with the risks so that your workers can negotiate their way safely around the dangerous jungle that is the office.

- Preventing injuries at workstations •
- Controlling dangers of fire, electricity and hazardous materials •
- Formulating emergency plans •

#### ON THE ROAD: THE LIGHTER SIDE OF LIFTING 889 CC/

#### 21:00 minutes

Follow Mike Melnik as he takes you on a trip and demonstrates how to lift in the real world. A refreshing departure from traditional videos, this program uses humor to effectively teach safe body mechanics in real-life situations. It teaches viewers how to choose the "right lift" and apply these back safety principles in a variety of lifting situations.

#### **OPENING PROCESS SYSTEMS:**

PART I – PLANNING AND PREPARING (1992)

VHS

716

16:50 minutes

Provides an understanding of the hazards of opening process systems, and the importance of planning and preparation in the prevention of line or vessel opening accidents and injuries. Topics covered include identifying the contents of a process line or vessel, developing a thorough plan for safety performing each step in the line or vessel opening procedure, and determining the need to use recommended personal protective equipment.

#### **OPENING PROCESS SYSTEMS:**

## **PART II – PERFORMING THE WORK (1992)717VHS**15:00 minutes

Provides an understanding of the hazards of opening process systems, and the importance of planning and preparation in the prevention of line or vessel opening accidents and injuries. Topics covered include performing system shut down, lockout procedures, depressurization, draining and purging, isolating the work zone, obtaining the necessary permits, safely opening the system, performing the work and closing the line or vessel.

## OPERATING A FORKLIFT SAFELY (1992)955cc/sp/vhsSpanish Only713Sp/vhs

17:00 minutes

Basic operating techniques and specific lifting procedures are covered. Determining lifting capacity, Pre-operation inspection, Basic operating techniques, Basic battery and propane use.

#### OPERATING FORKLIFTS SAFELY (2004) 895 cc/

#### 20:00 minutes

Forklifts are basically simple machines, but they are also massive and powerful. If they aren't operated safely, the results can be devastating. While there are a lot of potential hazards associated with operating a forklift, you can avoid incident and injury by knowing 1) how your forklift operates, 2) how to safely carry your loads and 3) how to follow the rules of the road. This program provides viewers with the basic information they need to know regarding these three areas of forklift safety.

#### **ORDER PICKER SAFETY**

9 minutes

Order pickers are used in many storage environments and are especially dangerous because the operator goes up and down with the load. This program focuses on best safety practices specific to this piece of equipment, including the use of fall protection. Additional topics covered include how the truck works, how to perform inspections, and how to safely operate the truck. *(CET Consultant comment: "Concise DVD that details the safety features of an order picker. The DVD demonstrated some unsafe behaviors, e.g. leaning outside the platform, however, clearly indicated that this was an unsafe behavior.")* 

## ORIENTATION TO THE BOARD OF HEALTY & SAFETY COMPLIANCE AND APPEALS

1053 DVD

CC/

959

#### 25 minutes

This video was created to give some background information as a board member on the Board of Health & Safety Compliance and Appeals and to place the board's work in context with the Michigan Occupational Safety & Health Act (MIOSH Act). An employer may file a first appeal

DVD

with the Michigan Occupational Safety & Health Administration (MIOSHA) for modification or dismissal of a MIOSHA citation item and/or any proposed penalty, or request an extension of time for abatement. If the employer has reason to contest MIOSHA's decision concerning the first appeal of the citation, it is then transmitted to the Board of Health and Safety Compliance and Appeals for consideration. The Board contains seven members appointed by the Governor for four-year terms. Three members represent labor in fields of construction, general industry, and health, respectively. Three members represent management. One member represents the general public.

VHS

DVD

DVD

VHS

25:00 minutes

Shows the importance of following basic safety rules when working with oxyacetylene mixtures. Ten rules of oxyacetylene safety are given and illustrated. The program also demonstrates the serious dangers and effects of misuse of oxyacetylene equipment.

20 minutes

If you work with or around an overhead crane, then this overhead crane safety video is a must see! Focusing on over three different types of overhead cranes, this crane safety video covers every aspect of crane safety to insure minimal accidents. A wide assortment of connectors (slings, chains, ibolts, lifting beams, etc.) are covered, as well as talk about sling angles and a pre-use inspection.

#### PANDEMIC FLU: THE FACTS (2009)

10:00 minutes

The threat of a global influenza epidemic is very real. Now is the time to insure your company is prepared for an outbreak in the workplace. This program is a great way to raise awareness in your workplace and give your employees training on the proper precautions they need to take so they act and react in a calm, confident manner in the event of an outbreak or potential outbreak situation.

#### PAPER MACHINE SAFETY

25:00 minutes

This video covers job safety analysis, ladders, ramps, and catwalks. It will discuss nip point, loose clothing, and hair. Trip hazards, maintenance work, PPE, chemical hazards, noise, signage, and safety lock procedures are talked about. It will also cover confined space, welding and cutting and fire prevention procedures.

#### PENDANT CONTROLLED CRANE SAFETY 990 CC/ 14:40 minutes Facilitator's guide included. Crane incidents are nearly always serious accidents with catastrophic and costly consequences. Ironically, most crane incidents are preventable. Topics covered in this video are: Selecting, attaching and removing rigging, and storing the block and crane. PERFORMING JOB SAFETY HAZARD ANALYSIS 501 VHS 19:00 minutes Training guide and video to enable supervisors and team leaders to take a practical, systematic

#### PERMIT REQUIRED CONFINED SPACE ENTRY 519 VHS

### 21:20 minutes

Protect your health and safety with proper training and by following safe work practices. Learn to control a permit-required confined space environment and prevent accidents which could lead to injury or even death.

#### PERSONAL FALL PROTECTION: ONE STEP BEYOND (2008) 940 CC/Sp&P/ DVD

13:00 minutes

This video reviews personal fall protection systems and anchorage equipment to protect workers from fatal falls. Rescue procedures after a fall are also covered. Includes: personal fall protection systems; lifelines, snaphooks, and harnesses; rescue; and equipment care and inspection.

#### **PERSONAL PROTECTIVE EQUIPMENT:** 816 CC/Sp/VHS/DVD **CREATE THE BARRIER Spanish only** 821 CC/Sp/VHS

### 12:00 minutes

This video addresses the issue of why PPE is so important. The unique approach we use in this program of best safety practices is sure to have your workers talking for months. This program covers:

Hazard assessment

approach to managing health and safety.

- PPE selection •
- PPE fit •
- Proper care and use of PPE.

#### **PERSONAL PROTECTIVE EQUIPMENT: REALITY IN THE PUBLIC SECTOR (2007)**

12:00 minutes

Trends may come and go, but safety will not. All the time, every time, public sector employees must wear their PPE. They face a lot of risks and must be prepared. Otherwise, the results can only be tragic. Give them a first-hand look at the consequences of not wearing PPE, through a worker's recounting of his accident. Stress the importance of using protective equipment. Covers:

- Wearing the right PPE for the job
- The importance of PPE •
- Employer's and employee's responsibility •
- Care and maintenance •
- Different types of PPE

930 CC/Sp/ DVD

## PERSONAL PROTECTIVE EQUIPMENT:

#### WEAR IT FOR YOU

#### 12 minutes

This is a powerful, true story of surviving a violent explosion during a routine maintenance procedure. Because of the PPE he was wearing, he is here today to share his moving story. Not only does David Dyck remind us of the importance of PPE, his story illustrates how an injury affects family, friends and co-workers. It's a message you won't forget.

#### PERSONAL PROTECTIVE EQUIPMENT: YOUR DEFENSIVE LINE

20:50 minutes

A football player wouldn't hit the field without a helmet or pads. This program will keep workers informed of the correct way to wear PPE to avoid any potential danger. This program includes an exciting and relevant opening that features football players getting ready to hit the field, making the connection with your workers that wearing PPE is the right, and safe, choice to make. Teach your workers to hit the job site with the necessary PPE to do their job safely. This program covers:

- Eye & Face Protection
- Head Protection
- Hearing Protection
- Hand Protection
- Foot Protection

PLAY IT SMART, PLAY IT SAFE (2000)		851	VHS

Use this Power Press Safety program to help eliminate power press injuries and incidents at your site. Teach your workers proper awareness and respect for the potential hazards of working with or around power presses. While the power press is an extremely useful machine, it is one that requires strict attention for safe and efficient operation. This thorough and effective program will teach your workers:

- Basic operations of power presses.
- Safety measures for point of entry.
- Importance of machine guards and engineering controls.
- Best safety practices.

#### PREVENTING HEARING LOSS (1993)200vhs

#### 11:00 minutes

Educates employees about risks to their hearing. Explains how excessive sound levels can damage hearing, how to protect your hearing from damaging sound levels and steps to take if a worker experiences symptoms of hearing loss.

#### PREVENTING MACHINE INJURIES (KITCHEN SAFETY) 752 VHS

#### 10:00 minutes

Kitchen Safety Series. This video looks at the different machines found in an industrial kitchen. It also shows safety training and demonstrates safe work practices.

#### 

22:00 minutes

In this motivating program, EMT/firefighter Martin Lesperance recalls the stories of the collision scenes he has attended to illustrate the consequences of the six most common driving errors. Stressed during the presentation is the point that most of these incidents were not accidents - they were actually predictable and preventable events that didn't have to happen. Viewers will learn the horrific consequences of motor vehicle collisions and understand the importance of a 100% commitment to safe vehicle operation.

#### PREVENTING SLIPS, TRIPS & FALLS 958 – GENERAL INDUSTRY

#### 14:46 minutes

This program provides information on how to create a safe environment for both employees and customers. Program highlights include the causes of slips, trips and falls, how to identify areas of hazard and how to prevent accidents from occurring. (*Consultation Education & Training Division consultant comment: "Good picture quality, covered most of hazards in workplace.* Topic should encourage firms to look at slip and fall hazards at their location.")

#### PRINCIPLES TO PRACTICE – PREVENTING INJURIES THROUGH EMPLOYEE TRAINING

#### 1070 CC/ DVD

CC/Sp/

DVD

#### 25 minutes

There are five basic safety principles that must be part of any successful safety program: management commitment, employee involvement, worksite analysis, hazard recognition and employee training. These concepts are also the key components of OSHA's Voluntary Protection Program. In this live presentation, safety professional and motivational speaker David Lynn discusses 15 real-world, successful techniques that can be used to put these five safety principles into practice. Designed as an awareness level program for safety leaders and

#### managers, the program will help viewers change safety attitudes and culture at their organizations.

includes accident prevention, building trust, and maintaining leadership.

Zero accidents in the workplace are a possibility and it all starts with a vision, according to astronaut Buzz Aldrin who sees pro-active safety as the way it can be done. This program

### **REACH TRUCK SAFETY**

8:26 minutes

This equipment's flexibility makes it more important to understand how to evaluate rated capacity, pick and place loads and clear racking. These trucks have an articulated carriage that can reach, tilt and shift from side to side, requiring the operator to have a greater understanding of safe usage. Topics covered include how the truck works, how to perform inspections and how to safely operate the truck.

REMEMBER CHARLIE		745	DVD
56:49 minutes	Spanish only	819	Sp/VHS
A deeply moving portrayal of the devast	ating real-life conseque	ences of the	abuse of safety
procedures. Designed to motivate audie	1		e
awareness and appreciation of safety. L	earn to become more re	esponsible fo	or your own safety on
the job, at home, and at play. Dramatically changes safety attitudes from uncaring, apathetic and			
routine to safety first & always.			

### **REPEAT OFFENDER - AVOIDING CUMULATIVE TRAUMA** 869

20:00 minutes

No matter how strong the person or the machine, if placed under enough stress for a long enough period of time, they will break down. Learn what it is and how to avoid cumulative trauma disorder.

### **RESPIRATORY PROTECTION**

13:00 minutes

Breathing - it's something we all do all the time, without even thinking about it. Most of the time we don't have to because the air around us is safe, but when we are on the job we could run into situations where it could damage our bodies or even be fatal. In times like these, we need to take personal responsibility for our safety, and that means using respiratory protection. This video alerts workers to the importance of protecting their respiratory systems and provides them with helpful tips for using and maintaining respirators properly. Topics include types of respiratory hazards, selecting the appropriate respirator and using respirators in emergencies. Fitting, cleaning, disinfecting and storing respirators properly are other topics covered.

#### **RESPIRATOR SAFETY**

16:00 minutes

Explains what kinds of respiratory hazards a worker might face and why these hazards require protection. Discusses the importance of wearing respirators when required.

### **RESPIRATORY PROTECTION**

12 minutes

This program is designed to provide your employees with the basics of respiratory protection. Revised to meet he new OSHA respiratory standard, the program alerts employees to the importance of protecting their respiratory systems and provides them with helpful tips for maintaining and properly using respirators. Also included is a clear explanation of the requirements of the OSHA standard.

## RESPIRATORY PROTECTION: ANOTHER WORLD (1995) 211 cc/ vhs

19:00 minutes

### 962 CC/ DVD

898 CC/Sp/ DVD

215

1046

VHS

Instructs workers on how to avoid exposure to airborne hazardous substances that can lead to serious health effects through the use of respiratory protection.

#### **RESPIRATORY PROTECTION:**

#### **THE INVISIBLE HAZARDS (1998)**

239 VHS

13:20 minutes

An overview of the respiratory system, how it works and how it can be damaged. Specific hazards are addressed and preventative measures to safeguard your respiratory system. The program covers:

- The importance of the respiratory system.
- How potential hazards can affect workers' health and safety.
- Types of respirators and their functions.
- Importance of qualitative and quantitative fit testing.

#### **RESPONSIBILITY TO ACT**

691 VHS

216

VHS

22:14 minutes

A true, tragic story of a school fire. The viewer sees how any one of many people could have RECOGNIZED hazards and then TAKEN ACTION to prevent the tragic outcome - but they didn't! Learn a four-step process - SEE, QUESTION, REASON, ACT - which is applied to office and industrial hazards in the video. At the end, employees will recognize their own "Responsibility to Act".

### RESPONSIBILITY: WHO'S IN CONTROL? 980 CC/ DVD

10 minutes

Most of us are aware of the obvious steps we can take to improve safety, such as using proper protective equipment and following company safety procedures. We may be unaware, however, that our actions and behaviors are just as important to our safety. Unsafe behaviors result in many industrial injuries. While we may work for some time without incident, eventually we will experience an injury if we continue to work unsafely. This video will help your employees understand the importance of taking responsibility for their own actions rather than allowing outside forces to control their behavior.

### **RETURN OF MILTON WHITTY**

16:41 minutes An award winning film. A dynamic and forceful sequel to "Inner Mind of Milton Whitty" film.

## RIGGING AND LIFTING WITH MOBILE

CONSTRUCTION EQUIPMENT 738 VHS

#### 27:30 minutes

Practical advice and real-world cautions on how to do on-site lifting jobs safely. Operator/Rigger teamwork, analyzing the load, determining proper rigging, how to figure and adjust for center of gravity on odd shape loads, Effects of various type hitches and angles on sling strength.

RIGGING SAFETY	818	VHS
12:30 minutes		

You will find in this video, 11 interactions in three lessons that ensure your riggers are properly trained on all aspects of their job. Prevent accidents and property damage with this training program. The program covers:

- The role of the rigger.
- Types of slings.
- Safe work practices.

#### **RISKY BUSINESS (OFFICE SAFETY)**

19:00 minutes

Offices are not necessarily safe environments. Hazards in offices are exposed in an entertaining but very informative format.

#### ROLLING TOWERS: MOBILE SCAFFOLD SAFETY 1004 DVD

#### 13 minutes

This video describes how to safely erect and dismantle mobile scaffolds. The video also educates construction workers on how to safely work on mobile scaffolds.

#### **SAFE BEHAVIOR – NO REGRETS**

989 CC/ DVD

VHS

682

1041

12 minutes

Facilitator's guide included.

Enhance your safety culture by emphasizing the importance of integrating interpersonal skills, hazard recognition, and positive reinforcement of safe behavior at all times, and in all job situations. This highly motivational message of the importance of safety helps your workers to integrate safety into everything they do – reducing accidents and lowering costs. Instilling hazard recognition and awareness skills in your workers will positively change their behavior – making safety a concern in every choice they make and action they take. This effective program covers: principles of behavior awareness, the power of positive reinforcement, the importance of interpersonal communication, and how to make best safety practices a part of your everyday work practices.

SAFE OPERATION OF SCISSOR & BOOM LIFTS (2006)	<b>987</b>	CC/	DVD
<i>Note:</i> Same video as #974 – Elevated Work Platform Safety.	To reserve,	please	see # <mark>974</mark> .

## SAFE OPERATION OF SCISSOR & BOOM LIFTS (concise version)

10 minutes

Concise version of #<u>974</u>: Elevated work platforms such as scissor and boom lifts allow us to safely perform various tasks and maintenance operations at heights that otherwise may be unreachable. While there are many different styles of lifts designed for various applications and site conditions, they all have one thing in common: the potential for serious injury or death when operated in a careless manner. Electrocution, falls, crushed body parts and tip-overs are just a few examples of incidents that often result from unsafe operation. This video discusses the procedures lift operators must follow to prevent these types of incidents.

#### SAFE RIGGING

731 vнs

20:00 minutes

Explains the procedures involved in rigging for a safe lift. Emphasizes the importance of paying attention to the rated capacity of all lifting equipment and explains variables that can make the difference between a successful lift and disaster.

#### SAFE USE OF HYDRAULIC BREAKERS,

#### SHEARS AND CRUSHERS

17:30 minutes

How to use impact breakers, metal shears and concrete crushers from pre-operation inspection to long term storage. How to conduct daily pre-start inspection. Checking the tool suspension system. Correct tool selection for the job. Carrier machine positioning when working with a breaker. Tool point types and applications.

#### SAFETY 101: HEARING PROTECTION:

## SOUNDS GOOD TO ME

14:00 minutes

This program covers the importance of proper hearing protection. It will discuss personal protective equipment; the effect noise has on our ears, and controlling harmful noise.

#### SAFETY AWARENESS II:

REAL ACCIDENTS, REAL STORIES (2009)	1016	DVD

20 minutes

Let experienced workers tell your employees how complacency toward safety changed their lives. In this video, real workers talk about how ignoring safety guidelines let to their on-the-job accidents and injuries. Each of these workers relates how their injury has affected their job, their personal life and their attitude towards safety. In the course of their conversation with you, they will cover:

- Common dangers in the workplace
- Dangers of safety complacency
- Safety guidelines and procedures
- Importance of proper PPE
- Safety training
- Life-changing effects of accidents

#### SAFETY BENCHMARKING WITH DYN MCDERMOTT (2008) 999 DVD

#### 45 minutes

"Safety Benchmarking with DynMcDermott" DVD uses an engaging, documentary style approach to teach you and your staff the concepts behind their safety success.

## SAFETY DURING RENOVATION & DEMOLITION OPERATIONS

20 minutes

This DVD provides practical guidance ensuring employee and public safety during demolition and renovation operations (non-structural work). It addresses high-frequency/exposures hazards, and includes information on controlling moisture and dust hazards.

## SAFETY - EVERYONE'S RESPONSIBILITY (1996)

## (Remember Charlie Part 2)

47 minutes

Charlie Morecraft's story. All the myths and misconceptions he had about safety blew up in smoke. Charlie tells why his accident never should have happened.

#### SAFETY IN A CONFINED SPACE

#### SAFETY LEADERSHIP -

#### A SUPERVISOR'S RESPONSIBILITY (2011)

20 minutes

A supervisor's commitment to safety can make or break any corporate safety plan, and directly impact productivity results and costs. This training program is designed to emphasize safety responsibilities for supervisors – underscoring the fact that, while safety managers have overall responsibility for safety, supervisors retain the responsibility for their employees' safety.

#### **SAFETY LEADERSHIP FOR EVERYONE (2003)**

20 minutes

Often the only difference between a world-class safety operation and a program struggling to move beyond regulatory compliance is the courage and willingness to put safety leadership into action. In this video, safety professional Tom Harvey discusses the traits that make a good safety leader. Several true-to-life situations in the workplace are used to illustrate his points. Stressed in the program is the fact that all of us can be safety leaders no matter what job or title we hold. Topics include connecting safety messages with actions, setting examples, why safety prizes often don't work, recognizing safe actions of co-workers and employee-powered safety.

SAFETY ORIENTATION "IT BEGINS WITH	I YOU"	814	CC/ VHS
16:05 minutes	Spanish only	822	CC/Sp/VHS

Helps develop a respect and understanding for potential hazards found on the job by explaining to your employees that safe work practices and procedures are established for their safety. This video addresses a wide range of safety topics:

- Personal protective equipment
- Good housekeeping procedures
- Hazard communication
- Ergonomic awareness
- Emergency evacuation procedures
- Chemical safety
- Signs, placards and labels.

#### SAFETY ORIENTATION: ON ALERT (2003/2008)

#### 24 minutes

This innovative program allows you to choose the new-hire training program that best meets the needs of your facility. Topics covered are: slips, trips and falls, hazard communication, PPE, fire safety, back safety, BBP, lockout/tagout, and evacuation.

#### SAFETY'S TOP 10

10:00 minutes

DVD

While the top 10 lists you see in magazines and on late night talk shows are created to get laughs, the list in this program focuses on a subject that is no laughing matter - causes of workplace injuries. With disturbing regularity, thousands of employees and contractors are injured or killed while on the job each year. Some people make the mistake of calling these types of incidents "accidents" and chalk them up to just "bad luck" or just being "in the wrong place at the wrong time, but safety professionals know better. Injury statistics show that the same types of incidents continue to occur over and over again. Viewers will see the top 10 causes of these incidents listed from 10 to one, but more importantly, they will learn how workplace injuries can be prevented.

#### SAVING SIGHT

607

VHS

19:00 minutes Motivates employees to use prope

Motivates employees to use proper eye protection through demonstration of eye injuries and demonstration with doctors concerning accident causes.

#### SCAFFOLDING SAFETY

727 VHS

15:00 minutes

Covers requirements for erecting, dismantling and maintaining scaffolds. Includes potential hazards, types of scaffold, ladder construction and, assembly and dismantling requirements.

#### SCAFFOLDING SAFETY: ERECTING & DISMANTLING 981 cc/sp/ dvd

18:26 minutes

#### Facilitator's guide included.

Properly erected scaffolds provide a safe elevated work surface to efficiently perform tasks when ladders or other lift devices are not feasible or practical. However, scaffolds can present extremely hazardous situations when they aren't erected or dismantled properly. This creates the opportunity for the scaffolding to collapse resulting in disabling injuries, property damage and even death. This program teaches workers: assembly and dismantling requirements, types of scaffolds, potential hazards, and ladder construction and usage.

### SCAFFOLDING SAFETY: SAFE WORK PRACTICES 953 VHS

11:00 minutes

This program is ideal for all employees who work on scaffolds, and for those who erect and dismantle them. Properly erected, scaffolds provide a safe elevated work surface to efficiently perform tasks when ladders or other lift devices are not feasible or practical. This video demonstrates best safety practices, outlines potential hazards, and creates awareness your employees won't soon forget. Training your employees the safe way to work on and around scaffolds keeps them safe and more productive, providing you a direct return on your training investment.

- Electrical, fall and falling object hazards
- Load carrying capacity and material handling
- Using ladders
- Good housekeeping strategies

#### SCAFFOLD SAFETY: IT'S NO JOKE (1997)

733

VHS

16:50 minutes

Reviews the safety requirements which apply no matter what type of scaffold in being used. Examines who can design and build a scaffold, things to look for before getting on a scaffold, fall protection and general safety procedures. Highlights setting up a scaffold, defective or damaged ropes or planks, use of substandard guardrails, working around overhead electrical lines, and overloading the scaffold.

#### SCAFFOLDS: SAFETY AT ALL LEVELS (2005) 732 CC/Sp&P/

10:00 minutes

Covers the role of the competent person, pre-assembly inspection, assembly, pre-shift inspection, safe work practices, and fall protection.

1018

247

703

#### **SEVERE WEATHER ALERT (2003)**

15 minutes

Severe weather can occur at any place at any time, and you and your employees will have to respond with little or no notice. Train your workers to be prepared for severe weather with this practical, realistic video that reviews the meanings of severe warnings and watches. Plus employees learn:

- How to stay safe when severe thunderstorms are approaching
- The hazards of flooding and moving water
- How to prepare for tornadoes in the home, automobile, at work or outside
- Precautions to take after a storm has passed

#### SHAKE HANDS WITH DANGER

23:00 minutes

Servicing and maintenance work around heavy equipment and in the shop calls for close attention to the rules of safety. This video has a message for those working with heavy machinery and common shop tools.

#### SKIN CARE AND SAFETY (1991)

13:00 minutes

When it comes to dermatitis - and most other skin problems - prevention is much easier and far less painful than treating a full-blown skin problem. And prevention at work and at home is what this program is all about. Employees learn six important rules that will help them prevent skin problems:

- Be aware of skin hazards
- Be aware of environmental hazards
- Wear the appropriate personal protective equipment
- Handle chemicals with care
- Follow housekeeping and hygiene rules
- Get medical attention

### SLIPS, TRIPS & FALLS: KEEPING A STEP AHEAD 767 CC/Sp/ DVD

12:00 minutes

Slips, trips and falls can be a significant source of injuries and even deaths on the job. This video covers preventive measures: when, where and how to use fall protection; techniques to avoid slips, trips, and falls; and safe work practices.

#### SMALL SPILLS AND LEAKS (1994)

707 VHS

18:00 minutes

DVD

DVD

VHS

VHS

Focuses on controlling small spills and leaks. Covers essential procedures all employees should know if a leak should occur on their shift. Topics: Supervisor notification, Securing the area, PPE, Controlling and containing the spill, Cleanup/decontamination.

#### STAIRWAYS AND LADDERS: THE FIRST STEP (2007) 939 cc/sp/ dvd

24:00 minutes

Routine use of stairways and ladders can lead to careless accidents. Review essential safety procedures with your workforce. This program offers important safety tips on using ladders properly and climbing stairs safely. The program includes: portable ladders, extension ladders, fixed ladders, safety on stairways.

#### **STEP RIGHT UP**

18:00 minutes

Ernie manages to violate nearly every safety rule concerning ladders. A funny, highly motivational video about ladder for home and industry.

#### **STOCK & PULP PREPARATION SAFETY**

25:00 minutes

This video talks of cutting scrap paper rolls, pulp prep including the PPE required. The proper handling of chemicals, unloading of bulk tanks, lab tech safety and QC safety are also covered. Maintenance issues such as cleanup are discussed and lifting techniques and some lock out issues are covered.

#### STREET SMART: DRIVING SKILLS

#### 12:30 minutes

This informative program is essential for all employees who operate a motor vehicle on and off the job. This video covers:

- Why safe driving is important to you
- Your responsibility for safe driving
- Driving skills to reduce risk exposure.

#### STRETCHING OUT AT WORK

#### 13:00 minutes

This motivational video helps reduce workplace injuries by demonstrating stretching and warmup exercises on the job. Your employees will learn why it is important to stretch before, during and after working to maintain a healthy body.

#### SUPERVISING A DRUG FREE WORKPLACE (1990)

18:06 minutes

As a supervisory, it's your responsibility to know your workplace drug policy and to enforce it. And because you're in day to day contact with your employees and you're familiar with their normal behavior patters, you're in the best possible position to detect behavior problems that may be drug related and to take corrective action.

## TAKE ELECTRICITY SERIOUSLY –

#### **DEVELOPING AWARENESS (1993)**

#### 14:00 minutes

Electrical incidents and injuries can happen to anyone - not just electricians - at work or at home. In fact, each year hundreds of deaths are caused by electrical hazards. And, electrical incidents

can protect yourself.

UNDERSTANDING THE ASBESTOS	S HAZARDS -		
JANITORIAL VERSION	Spanish only	802	Sp/

10:10 minutes

This safety video uses multiple scenes from different building environments and shows how janitorial and other maintenance workers may be exposed to asbestos in building components. It covers, in detail, protective measures to reduce the amount of exposure and what to do if workers discover asbestos in their work environment.

Motivate workers to use best safety practices when working with asbestos, by training with this thorough program. Using multiple scenes from different building environments, this program shows how janitorial and other maintenance workers may be exposed to asbestos in building components. It covers, in detail, protective measures to reduce the amount of exposure and what

to do if workers discover asbestos in their work environment.

A dynamic and easy to understand program that has trained thousands of workers on awareness and abatement techniques. Live action footage of actual asbestos removal from steam pipes using glove bags as well as other large scale techniques.

#### UNDERSTANDING THE ASBESTOS HAZARDS 804 VHS

#### 21:55 minutes

This program teaches workers about the potential hazards posed by asbestos-filled material such as ceiling panels, insulation and floor tiles, and trains them on how to reduce their exposure. All workers including janitorial and facility maintenance workers, who may be indirectly exposed need to know when building components might expose them to asbestos fibers.

#### UNDERSTANDING & PREVENTING EYE INJURIES 1042 DVD

#### 10 minutes

About 2,000 workplace eye injuries requiring medical attention occur each day. Most of these injuries are suffered by employees not wearing eye protection or wearing the wrong protective devices for the job. This program emphasizes the importance of wearing the proper protection when eye injury hazards are present so employees can avoid needless burns, punctures, foreign objects and other threats to their vision.

UNDERSTANDING & PREVENTING	1060	DVD
HEAT-RELATED ILLNESSES		

17 minutes

As hot conditions intensify this summer and we continue to perform our regular job duties, the potential for heat-related illnesses rises dramatically. Collectively known as heat stress, these illnesses are serious and can even cause death in some cases. Your employees must be vigilant in their efforts to prevent them. This program discusses how hot conditions affect the human body, the symptoms of heat-related ailments and what to do if we start to experience them, how to treat victims of heat stress and most importantly, the precautions that must be taken to avoid problems when working in hot environments. Other topics include becoming acclimated to the heat, use of the buddy system, preventing heat stress at indoor facilities and specialized clothing and protective devices for working in hot conditions.

#### UNDERSTANDING & PREVENTING LADDER ACCIDENTS 1043 DVD

10 minutes

Each year, there are more than 164,000 emergency room-treated injuries in the U.S. relating to ladders. The unfortunate truth is that all of these injuries are preventable; by following a few simple guidelines and procedures you can work safely on ladders and avoid becoming a statistic. The purpose of this program is to review these basic guidelines and procedures so your employees can prevent ladder-related mishaps.

#### UNDERSTANDING SAFETY AT WORK (2006) 880 CC/ DVD

#### 24:00 minutes

A-Z of workplace safety. The consequences of poor industrial safety practices can result in serious injury, increased absenteeism, sick days and even death. An organization can minimize the risk of accidents and incidents occurring by implementing appropriate safe work procedures.

USING LADDERS SAFELY

1057 DVD

15 minutes

DVD

Ladders bring portability and flexibility to any job that extends above the ground. But if not used correctly, ladders can be dangerous. The program includes information on step ladders, extension ladders and articulated or multi-purpose ladders. Your employees will learn: how to select the right latter for the job; how to inspect a ladder for damage; how to set up a ladder properly; and how to climb and work on a ladder safely.

#### VALVE SAFETY

15:00 minutes

Proper valve safety training can limit accidents and prevent injuries while saving time, money, and lives. This video emphasizes ergonomics and the best safety practices to prevent strains, sprains and incidents when operating valves. The following important information is covered:

- Recognizing different types of valves.
- Identifying common valve hazards.
- Step-by-step valve risk assessment.
- Ergonomic issues related to valve safety.
- Best safety practices for working with valves.

#### WELDING SAFETY

13:20 minutes

This program teaches employees to recognize and respect the potential hazards and motivates them to use best safety practices to prevent property damage and injury. It covers:

- Types of welding
- Potential hazards
- Purpose and importance of ventilation
- Proper personal protective equipment
- Purpose and procedures of a hot work permit
- Fire prevention techniques
- Special welding situations

### WELDING SAFETY "RESPECTING THE HAZARDS" (1996) 793 VHS

14:50 minutes

This program promotes an awareness and respect for the potential hazards of welding operations and explains ways to protect the health and safety of welders. Understanding and recognizing the potential hazards, inspecting the environment and equipment, and following proper procedures while welding are the keys to a safe and healthy welding environment.

### WHAT WOULD YOU SAY? (2005)

15 minutes

We all occasionally witness unsafe behavior. But talking with our co-workers about safety can be difficult. We don't want to hurt feelings; we don't want to make people mad but we don't want anyone to get hurt. This new video helps us learn to effectively communicate with our coworkers when we see them behaving unsafely. What Would You Say? Features three potentially hazardous workplace incidents in which workers confront each other about the hazards. In each incident, examples of poor communication are demonstrated and then examples of effective and positive communication techniques are demonstrated - techniques that we can all use on the job and off. This DVD focuses on easy to use communication techniques including: be positive, show that you are concerned about their safety, explain the consequences of the hazard or unsafe behavior, and be specific with your comments. The DVD also helps us learn to respond in a

#### WHEN FIRE STRIKES:

#### **COMMERCIAL KITCHEN EMPLOYEES**

14:00 minutes

Encourages fire safety awareness and prevention in commercial kitchens by showing how attitude, prevention and reaction can control fires and their damage. Shows the roles of management and employees in fire safety and preparedness, and how a team approach makes kitchen fires less likely.

#### WHEN YOU LEAST EXPECT IT

19:00 minutes

This award-winning video stresses defensive driving attitudes as well as techniques. Dramatic auto accidents are executed by professional stunt drivers from the Joie Chitwood Thrill Show. This program provides positive reinforcements in a dramatic style! Include an excellent section on the importance of using seat belts.

#### WINTER DRIVING: WHEN THE RULES CHANGE 1002

15 minutes

This attention-grabbing new 15-minute video dramatically illustrates the importance of adjusting our driving techniques when winter rolls around. Aurora's "famous" Larry character also appears in this video making one winter driving mistake after another; mistakes we can all learn from. When the Rules Change also includes a powerful interview with a woman who was involved in fatal wintertime crash - an event that changed her life forever. The video addresses: vehicle preparation for winter; adjusting schedules for winter driving conditions; maintaining good visibility; winter driving techniques, including intersections, cornering, skid control, braking and slowing down; and winter survival supplies and techniques.

#### WINTER SAFETY (2009)

15 minutes

This video covers staying warm, driving in winter weather, working outside in winter weather, winter fun, your house in the winter, and winter decorating.

#### WINTER WALKING: AVOIDING SLIPS & FALLS (2008) 983 CC/ DVD

#### 10 minutes

One of the quickest ways to have an accident in the winter time is by simply walking around in the great outdoors with your mind on other things. Snow, cold, rain, sleet, ice, wind, and decreased visibility are all factors in the dangers that winter walking presents. If you have a job that requires walking outdoors, this video program could help keep you from becoming an accident victim. Training points covered include walking on slippery sidewalks, entering and exiting buildings, climbing slippery steps, stepping off of or over curbs, being alert to painted surfaces or ice under the snow, and getting in and out of vehicles on snow and ice.

#### WORKING AROUND CRANES (2010)

19:00 minutes An inspection technique to make sure your crane is ready to do the job. Techniques include daily and monthly inspections; rigging; and preparing for inspection.

Sp&P/VHS/

#### WORKING AROUND CRANES (2010)

DVD

1064

#### 18 minutes

Teach your employees how to identify and prevent the hazards associated with working around cranes - before those hazards become accidents.

- Proper PPE to wear around cranes
- Crane assembly
- Wire rope/lifting
- Signaling

#### WORKING SAFELY IN HOT ENVIRONMENTS

#### 15 minutes

Whether you work in a hot environment or you're outside on one of those "dog days of summer", this program shows viewers how to recognize and respond to various heat-related problems. Featured are several scenarios with some of the physical symptoms and appropriate First Aid procedures for each illness.

- Heat rash, aka "prickly heat"
- Heat cramps
- Heat exhaustion
- Heat stroke
- General precautions and getting acclimated to hot environments.

#### WORKING SAFELY ON SUSPENDED SCAFFOLDING (2001) 985 CC/ DVD

#### 22 minutes

Suspended scaffolds are unique tools that allow us to work in high, hard-to-reach areas. Safety is a crucial issue when working above ground - an estimated 10,000 scaffold-related injuries occur each year. To address this issue, OSHA has developed regulations specifically for workers who erect and work on scaffolds. These regulations require employers to train workers on the rules and regulations for suspended scaffolds before they use them. This video focuses on suspended scaffolds and the safety and training regulations developed by OSHA for working with them. Topics include preparation for erecting scaffolds, installing ropes and suspension devices, preparing hoists for operation, selection and use of scaffold platforms, inspection of scaffolding equipment, working near electricity, preventing falls and protection against falling objects.

#### WORKING IN PAIN (1994)

#### 846 VHS

VHS

510

#### 10 minutes

Frequency, force and posture create problems. That's why problem have emerged in office setting previously thought to be low risk. This program can help you address those problems.

#### WORKING KNIGHT

11:00 minutes

How to inspect and wear modern personal protective devices - hard hats, gloves, eye wear, hearing protection, safety shoes, etc.

#### WORKING ON AERIAL LIFTS, CRANES & SWING STAGES 679 VHS

#### 15:00 minutes

Explains the importance of inspecting aerial equipment before start of work, warming up engine and hydraulic systems, maintaining safe clearance from electrical current and wearing hard hats and other safety gear.

## WORKING SAFELY WITH PORTABLE

#### 512 VHS

1047

823

866

#### **INDUSTRIAL GRINDERS (1986)**

10:00 minutes

Area safety, personal protective equipment, equipment checks and proper operation of both straight and side grinders.

#### WORKPLACE HARASSMENT IN INDUSTRIAL FACILITIES 1087 DVD

#### 17:00 minutes

Most of us cannot do our work without interacting with other people. Effective communication is usually part of the job, and cooperation can be essential. When interaction, communication and cooperation are hindered in some way the workplace can become "toxic" and threaten our sense of wellbeing. Feelings of stress, frustration and anger can boil to the surface. Attendance, productivity, quality and safety often suffer. When people hear the word "harassment," they usually think of sexually-related activity. But harassment encompasses a wide range of behavior from practical jokes to intimidation. It can also include threats, verbal abuse and discrimination, even stalking and assault and anyone can be subject to it. Topics covered in this video include:

- The nature of workplace harassment.
- How to recognize various types of harassment.
- How to handle verbal abuse and threats.
- The many forms sexual harassment can take.
- How to recognize the many variations of "assault". •
- Knowing what to do, and what not to do, when confronted with a stalker. •
- How fostering a positive workplace environment can increase productivity and safety.

#### WORKPLACE SAFETY INVESTIGATORS: **GROUNDSKEEPING SAFETY**

19 minutes

After a frightening incident, expert workplace investigators are called to crack the case. In the midst of the story, viewers will learn about the hazards of exposure to the various machinery and elements of outdoor work environments. In this landscaping video, emphasis is placed on working in the elements and how to recognize, prevent and handle heat stress situations. Basically, this is a landscaping video that specializes on preventing complacency from entering into landscaping training.

### WORKPLACE VIOLENCE: CUSTOMER SERVICE

#### **AND FIELD PERSONNEL (1994)**

#### 26:00 minutes

Behavior that crosses the line is unacceptable in any workplace situation. If a co-worker, vendor or customer takes their anger out on you, you don't have to take their disrespectful treatment. You can and should assert your right to be treated with the support systems at your workplace. By standing up for yourself in the appropriate way, you may even prevent more serious conflicts from developing.

#### WORKPLACE VIOLENCE PREVENTION: **IMPLEMENTING YOUR PROGRAM (2004)** 20 minutes

DVD

VHS

This program will help you understand the essential components of a workplace violence prevention program and how to easily implement one in your workplace.

#### YOUR BACK AT WORK (1988)

This program can help you prevent spinal injuries by showing you how your back works, how to lift safely, and how a healthy life style helps your back.
