Contents

ACKNOWLEDGMENTS	xiii
INTRODUCTION	xv
1 What Is Android?	1
Brief History of Embedded Device Programming	2
Open Handset Alliance and Android	5
Introduction to Android	6
2 Downloading and Installing Eclipse	9
Why Eclipse?	11
Downloading and Installing the JRE	12
Downloading and Installing Eclipse	18
3 Downloading and Installing the Android SDK	21
Downloading the Android SDK	24
Downloading and Installing the Android Plugin for Eclipse	24
Configuring the Android Plugin for Eclipse	30

4 Exploring the Android SDK	35
What Is in the Android SDK?	37
Android Documentation	38
Android Samples	39
Try This: Run the API Demos Sample Application	41
Android Tools	45
APIs	48
Application Life Cycle	49
Standard ASP Application Life Cycle	49
Android Application Life Cycle	50
5 Application: Hello World!	53
Creating Your First Android Project in Eclipse	55
Examining the Android-Created Files	61
AndroidManifest.xml	62
Referenced Libraries	62
Directories	63
Hello World! Again	69
Hello World! Using an Image	72
Hello World! Code-Based UI	75
Hello World! XML-Based UI	78
Try This: Use TextView and ImageView	81
6 Using the Command-Line Tools and the Android Emulator	83
Creating a Shell Activity Using the Windows CLI	84
Running the ActivityCreator.bat	85
The Project Structure	88
Creating the Hello World! Activity in the Windows CLI	95
Editing the Project Files	95
Adding the JAVA_HOME Variable	96
Compiling and Installing the Application	97
Hello World! on Linux	109
Configuring the PATH Statement	109
Try This: Create an Image-Based Hello World! in the CLI	115
7 Using Intents and the Phone Dialer	117
What Are Intents?	119
Using the Dialer	124
Placing a Call from Your Activity	128
Adding the Intent to Your Activity	129
Editing Activity Permissions	131

Modifying the AndroidPhoneDialer	136
Adding a Button	136
Implementing an EditText View	141
Try This: Modify the AndroidPhoneDialer Project	145
8 Lists, Menus, and Other Views	149
Building the Activities	151
Intent Code for the .xml File	152
Intent Code for the .java File	154
Modifying the AndroidManifest.xml	155
Using the Menu	157
Creating the Activity for AutoComplete	163
Button	173
CheckBox	178
EditText	183
RadioGroup	189
Spinner	195
Try This: Modify More View Attributes	202
9 Using the Cell Phone's GPS Functionality	203
Using the Android Location-Based API	204
Creating a kml File	205
What Is a track File?	208
Getting the nmea File in Windows	208
Getting the nmea File in Linux	210
Reading the GPS with the Android Location-Based API	212
Creating the AndroidLBS Activity	212
Passing Coordinates to Google Maps	222
Adding Zoom Controls	226
Try This: Toggling Between MapView's Standard and Satellite Views	232
10 Using the Google API with GTalk	239
Configuring the Android Emulator for GTalk	241
Implementing GTalk in Android	244
Creating the Activity's Layout in the GoogleAPI.xml	245
Adding Packages to GoogleAPI.java	247
Implementing the View.OnClickListener	248
Compiling and Running GoogleAPI	252
Try This: Add a Settings Feature to Your GoogleAPI Activity	255

11 Application: Find a Friend	257
Creating a SQLite Database	259
Creating a Custom Content Provider	263
Editing the strings.xml	263
Creating Your Content Provider	265
Creating the FindAFriend Activity	276
Editing AndroidManifest.xml	276
Creating the NameEditor Activity	278
Creating the LocationEditor Activity	283
Creating the FriendsMap Activity	293
Creating the FindAFriend Activity	299
Running the FindAFriend Activity	302
Try This: Real-Time Location Updating	305
12 Android SDK Tool Reference	307
Android Emulator Commands	308
Android Debug Bridge Commands	310
Index	313

Master the Android™ mobile development platform

Build compelling Java-based mobile applications using the Android SDK and the Eclipse open-source software development platform. *Android: A Programmer's Guide* shows you, step-by-step, how to download and set up all of the necessary tools, build and tune dynamic Android programs, and debug your results. Discover how to provide web and chat functions, interact with the phone dialer and GPS devices, and access the latest Google services. You'll also learn how to create custom Content Providers and database-enable your applications using SQLite.

- > Install and configure Java, Eclipse, and Android plugin
- > Create Android projects from the Eclipse UI or command line
- > Integrate web content, images, galleries, and sounds
- > Deploy menus, progress bars, and auto-complete functions
- > Trigger actions using Android Intents, Filters, and Receivers
- > Implement GPS, Google Maps, Google Earth, and GTalk
- > Build interactive SQLite databases, calendars, and notepads
- > Test applications using the Android Emulator and Debug Bridge
